Thread: [New Online Symbol?](#)

Academy Awards - December 13, 2016, 11:18 am

So, whenever I'm on HF (I know this is small but, might as well) the little online symbol next to our name looks a bit outdated.

I mean at first it was cool, but now I feel it's getting old.

Maybe it's just me.

Vitani - December 14, 2016, 4:12 am

I actually don't really mind it as it's just one of those signature things that HF has in my opinion. It would not hurt if it was replaced by an updated icon but this one has style.

clrlslwi - December 14, 2016, 4:14 am

I really don't see any issue with it. Looks fine to me.

Anyhow, the icon is fine. Reminds me of 'ol MSN days.

I might file a request later today in your thread.

(Dec 14, 2016 08:45 AM)xadamxk Wrote: [\[CITE\]](#) Go to my threads.

Find userscript request thread.

Make request.

Profit.

I'm pretty terrible with JS and JQuery.

There is a pretty huge bug right now.

Going to fix that tonight hopefully.Done.
