Thread: [PEN TOOL LOGO DESIGN.](#)

AlCapone. - December 13, 2016, 7:37 pm

Just been messing around with the pentool in photoshop, before i make a move to AI, it only took me 20 mins, nothing special...just want to know if it would be worth improving or not.

THANKS ?

I feel like i've seen this logo somewhere before, or something similar at least

not really a fan of the font, but otherwise good job

Good way on increasing your knowledge, nonetheless it's a clean work somehow. Try to recreate some anime eyes, you can surely find a few on google images. That should help you understand things a lot easier.

Cheers.

I dont think that may be possible, I designed this off of a sketch my nephew started, its semi based off Yu Gi Oh eyes he is really into Anime and Manga etc.

but thanks and the font isnt important to me really was just messing with the pentool thanks anyways.

Perhaps want to put right eyebrow layer over the eye itself, other than that seems to be okay. Also not sure if you made this logo for something or just playing around, but I'd defenitely change the text font. Good stuff, keep it up mate. :)
