Thread: [\[NO PM\] Gamertag Exploit/Glitch | CLAIM OG GAMERTAGS NOW!](#)

g?th - December 14, 2016, 5:39 pm

Will be giving out the Gamertag "exploit" or "glitch" that's been taking the tag market by storm for the past few days.

Step 1. Make an email account on <http://outlook.com>.

Step 2. Download an Android emulator like memu, bluestacks, or nox.

Step 3. Download the Xbox app, not the smartglass app.

Step 4. Sign into the Xbox app with your email.

Step 5. Type in spaced tags, hit check availability, and then claim. If it gives you an error, it's taken. It should create it if it's available.

Step 6. Repeat

Doubt these will get banned, but even if they do, it's still worth the chance. Good luck to all, and share this to your friends in case they want to know. ?

Did not work for me, my username was T e sting and it is stuck like that. Does it have to be "t e s t i n g"?

If so, every single one is fucking taken.

If so, every single one is fucking taken. I think the original one has to be deleted. Although, I am not sure.

The method has been out for two or three days, but kept pretty private, so I'd assume most good tags are taken. Try to go for things not many people would think of. Can be spaced however you'd like, for example, I got "R o x y" and "d epressed".

I also did: t e d x t alks and it is stuck like that, is it patched or am I missing something?

Doesn't crash for me. Make sure you're using the Xbox app and not Smartglass.

So is this confirmed working? O_O

Bagon - December 15, 2016, 8:05 am

Does it work with an Android device or do I need an emulated version?
And does the unspaced version have to be reset?

Yes, I wouldn't waste my time poting if it wasn't.

A NEW ERA... - December 15, 2016, 1:44 pm

GG to prices, got me fucked up if you think i'm playing 150+ for a fucking gt now.

Zelyix - December 15, 2016, 8:54 pm

I'm also having issues. I typed space tags such as "t e s t i n g" and it stays with the spaces. what am I doing wrong?

NYCVN - December 15, 2016, 11:40 pm

Thank you.

How spaced do the GTs have to be?

(i.e. g a m e r t a g
gamer t a g
g a m e r tag)

You can space them however you want.

NDNKY - December 16, 2016, 7:53 am

Can you explain this? I don't understand what you mean. Can you not make spaced gamertags otherwise anymore?

It's a glitch to get some taken Gamertags.

DopplerAF - December 16, 2016, 1:59 pm

Well its not working for me every time I do that with no matter how much spacing My bluestack get crashed.

Does anyone else get it working I would love to see it.

V?rt - December 16, 2016, 7:19 pm

I can't download bluestacks, could someone possibly get a tag for me :3 I know what I want and I'm willing to bet it's not taken.

Villxin - December 26, 2016, 9:58 pm

Does this still work? Appreciate a response. I couldn't even get the Xbox App to launch on BlueStacks but if someone can confirm whether or not it's been patched that would be great.
