Thread: [Impress someone](#)

h8me - December 15, 2016, 5:23 am

Have you ever tried to impress someone with hacking? I mean someone you like or even love? And how did you do this? Can you give some tips? I think I love a girl, but she doesn't know me very well... I would like to impress her...

Monstertov - December 15, 2016, 5:24 am

I don't think hacking is the best way to impress someone. And certainly don't hack her lol.

Theory-Freak - December 15, 2016, 5:25 am

The only one that I try to impress with "hacking" is myself! I don't think this is a good way to impress a girl man. It really sounds like you need a mentor if your really suggesting this.

I love how this is your first post,
like i'm imagining you looking up "hacking forums" and you making an account just to ask this question.

also don't bring up you hack, like ever really, most people will just think of you as a cunt.

Make a lot of money from ethical hacking, she will be all over you.

Mongu - December 15, 2016, 5:47 am

No, you don't impress people by hacking if you're an actual hacker.

I don't think I've ever heard of an actual hacker being like "OI CUNTS COME LOOK AT ME HACK THIS CHICK TO IMPRESS HER"

Goku???? - December 15, 2016, 5:48 am

When I was a little younger, I tried to do this although I was just a skid/scrub. She just looked at me as if I was some weirdo. Hahaha, never again mate.

spooky hacker - December 15, 2016, 5:50 am

why dont u give her one of these

An?iety - December 15, 2016, 5:50 am

Never go to the dark side, or make it seem like those underground basement dwellers who spend all day on their computer trying to "hack"

Get smart and don't use the word "hack" "hacking"

For example I am 20 and I am currently working with an outsourcing I.T company and I am subcontracted as an I.T manager/ System admin for a local independent school district.

That's my response when they ask me in what do I work, their panties usually drop when they hear that, obviously they might not understand much and they probably only hear = \$\$\$

I got pissed cause my gf was talking to another guy and she was like "no i like you and you only" I was like "yeah okay"

she than proceeded to facetime the other guy and snapchat him. Soon after I found out she was still doing it I was done. I decided to dox the other guy. whilst doxing him I discovered that he had a lot of info on some public databases, I used some of the logins to get into his social media accounts. I than got into this facebook and posted on there something along the lines of "I wanted to share something with you all today.. I am gay, I have been gay since the 1st grade..." My girlfriend soon after saw the post and couldn't believe it. she stopped talking to him and he soon after went MIA and heard nothing from him since. I have no regrets. I dumped the girl btw cause she was practically cheating on me.

I think it would make somebody worry about their sense of security against you. Probably not a good idea.

frsnix - December 15, 2016, 7:09 am

I hope for your sake you don't go around in class talking about how you hack this and that. Do they ask you to hack social media accounts?
