>> Frequently Asked Questions <<

Q. Why is the price so high? This seems overpriced.

A. The price in my eyes is actually still low considering how profitable these methods are. This isn't some random write up these methods are seriously backed with research from experienced Bustabit players.

Q. Does this work worldwide?

A. Yes this works absolutely anywhere in the world, you can even use a mobile device!

Q. What age do I have to be to use this?

A. There are no age requirments you can get right to using this no matter what age!

Q. Is this difficult to use/setup?

A. No you can get earning right after purchase. There is no setup required so profits are nearly immediate!

Q. How much can be earned with this method?

A. This can all vary, generally you can earn \$60-\$200 an hour based on your investment. It is very well possible to earn even more then that, this can be scaled!

Q. If you are profiting why are you selling the method?

A. This method can never be saturated which means selling it doesn't hurt it, I am quite new to hf and would like to expand my knowledge while still earning an extra buck on the side as well. Finally most importantly I am currently looking to purchase a nice car so the extra income takes care of my bills while my profits from this method go to my car funds.

Q. How does this work?

A. Bustabit technically has 2 games running per round. It is Player vs House and Player vs Player. The method takes advantage of player bonuses thus creating an overall odds advantage allowing for constant long term profits.

Q. Which package should I pick?

A. In general terms I always recommend going with the squid package. The extra method is actually useful and very profitable as well plus the support and extra features really help out a lot. The method is a lot more explain too.

Q. Can I expect steady earnings?

A. Yes it is very reliable but remember gambling is never certain. You should see something along the lines of this though:

I was thinking the same but honestly I've made some good money recently and decided what the heck and purchased. Let's just say with high price comes high quality.

The quality of this ebook is literally unbelievable. 9 pages with like size 12 font and there are images etc to very clearly explain everything. This is completely up to you. BustaBank will calculate for you how much of your initial deposit to use etc and eventually you will be multiplying your investment.

You could deposit anywhere from \$10-\$100 and in the end you will still get the same result, the only difference is lower investment takes a bit more time obviously.

Hey there, some great questions that surely will help many others too.

To use this method you don't need ANY skills or requirments, you simply follow and execute. A 10 year old can do it easily too in no time. But since you are not fully familiar with bustabit let alone BTC I would suggest getting the ultimate version so you get personal support etc. The only currency you need is BTC and you will be just fine!

Hope that helps and if you got any more questions please don't hesitate to ask!

>> Frequently Asked Questions <<

Q. Why is the price so high? This seems overpriced.

A. The price in my eyes is actually still low considering how profitable these methods are. This isn't some random write up these methods are seriously backed with research from experienced Bustabit

players.

Q. Does this work worldwide?

A. Yes this works absolutely anywhere in the world, you can even use a mobile device!

Q. What age do I have to be to use this?

A. There are no age requirements you can get right to using this no matter what age!

Q. Is this difficult to use/setup?

A. No you can get earning right after purchase. There is no setup required so profits are nearly immediate!

Q. How much can be earned with this method?

A. This can all vary, generally you can earn \$60-\$200 an hour based on your investment. It is very well possible to earn even more than that, this can be scaled!

Q. If you are profiting why are you selling the method?

A. This method can never be saturated which means selling it doesn't hurt it, I am quite new to hf and would like to expand my knowledge while still earning an extra buck on the side as well. Finally most importantly I am currently looking to purchase a nice car so the extra income takes care of my bills while my profits from this method go to my car funds.

Q. How does this work?

A. Bustabit technically has 2 games running per round. It is Player vs House and Player vs Player. The method takes advantage of player bonuses thus creating an overall odds advantage allowing for constant long term profits.

Q. Which package should I pick?

A. In general terms I always recommend going with the squid package. The extra method is actually useful and very profitable as well plus the support and extra features really help out a lot. The method is a lot more explain too.

Q. Can I expect steady earnings?

A. Yes it is very reliable but remember gambling is never certain. You should see something along the lines of this though:

Vouch for this question..

P.S. My Review:
Fairly simple and nice method, not sure if it should be worth how much it is and the standard and premium packages are too similar to be sold separately, but if this can be turned into an autobet script it works great =)

(With a hint of martingale)

(Dec 16, 2016 09:11 AM)raider_pride179 Wrote: [\[CITE\]](#) I was thinking the same but honestly I've made some good money recently and decided what the heck and purchased. Let's just say with high price comes high quality.

The quality of this ebook is literally unbelievable. 9 pages with like size 12 font and there are images etc to very clearly explain everything. The manual methods themselves definitely make sense and I doubt I am ever going back to scripts. Money is much faster and safer plus when you play with Enterprisers method you can always ensure that the bonuses are brining you in extra profit at the end of the day.

Anyways holy crap lol I played for 3 hours and this was the result:

Damn homie that's a lot of profit!
