mural - December 16, 2016, 12:16 am

Damn.

Good video OP I enjoyed the part where you CTRL + V.

Can vouch, just beat skeet, aimware, iwebz, x22, and project with this in 1 v 5 MM hvh

/s

ahemokay - December 16, 2016, 4:14 am

Probably not even too wrong

Flaws. - December 16, 2016, 4:21 am

Lmfao so much shade

gg well played pal

Rayner - December 16, 2016, 4:32 am

Hopefully you won't get banned for posting this!

If anything he will just get a salty Justin on the thread

sm?ked - December 16, 2016, 5:10 am

>accurate representation imo...

Didn't you buy pcheeto?

creki - December 16, 2016, 7:15 am

Didn't you buy pcheeto?
Wouldn't a customer know how bad the cheat really is then?

JUSTIN - December 16, 2016, 3:17 pm

(Dec 16, 2016 05:56 AM).Jasper Wrote: [\[CITE\]](#) salty Justin
wat? I thought it was well established that we embrace the meme.
[Video: <https://www.youtube.com/watch?v=MMWTav7QcD0>]
literally paid for that meme

edit: just realized where you pasted the code, holy fuck
it would've made it funnier if I knew you were joking but considering you couldnt multiply an integer
by 2 like a few weeks ago I wouldn't be surprised if that move wasn't satirical

yeah so its funny when you make a meme about your own cheat but whenever someone else does
it then you get salty.

with it, your sales are dropping so hard you have to sell shitty domains that aren't worth a hobo's ass
crack
what? i didnt even know I was selling domains to make money o_o
we've had to deny a few people in the last week, been getting some LQ purchase requests since I
posted the new thread
since we're keeping pcheeto at 30 slots we're trying to maintain an HQ userbase

your parents need to supervise you, if I had a child with a severe disability I wouldn't let them use
the internet (xd just kidding friendo)

goodness that was fun, I love arguing/messing around with inferiors

don't take it too hard, I was just goofin around, dunno why you got so upset just because you didn't
win the free car

dont get mad because everyone called you out for being inexperienced man, its ok you can admit
its a paste.

STYLING - December 16, 2016, 4:04 pm

mfw people actually bought his cheat, was kind of obvious the guy had no coding experience
whatsoever, even by the way he replied to questions about his own cheat

-CodeX - December 16, 2016, 4:12 pm

(Dec 16, 2016 04:17 PM)JUSTIN Wrote: [\[CITE\]](#) you couldnt multiply an integer by 2 like a few weeks

yeah you couldn't change the hash of a program a few months ago, your point?

JUSTIN - December 16, 2016, 4:13 pm

(Dec 16, 2016 04:59 PM)-CodeX Wrote: [\[CITE\]](#) dont get mad because everyone called you out for being inexperienced man, its ok you can admit its a paste.

I am inexperienced when it comes to cheat development, but it's not pasted.

(Dec 16, 2016 05:04 PM)STYLING Wrote: [\[CITE\]](#) kind of obvious the guy had no coding experience whatsoever! I've been coding for years, but I've just started learning cheat development a few months ago. All of my customers are satisfied and I'll be accepting a member or 2 a week until we reach our set slot capacity. I've denied 2 ppl in the past 4 days, it's not like people don't want the cheat just because I'm inexperienced. When it comes down to it, it's a custom slot based cheat with an extremely limited userbase. It has a solid list of features and they all work flawlessly as intended. It's not a surprise that a cheat like this appeals to some people. I've NEVER claimed to be an experienced cheat developer, nor did I claim that pcheeto was better in function than an internal p2c or something - it's more affordable and it's just what some people are looking for.

(Dec 16, 2016 05:12 PM)-CodeX Wrote: [\[CITE\]](#) yeah you couldn't change the hash of a program a few months ago, your point?

>changing hash of a file

>multiply a number by 2

is it wrong to be on the floor? i simply didn't have a complete understanding of how a files hash was calculated, asking a question on something like that isn't shameful (even though in hindsight I could've googled it) I decided to ask on HF since the tool I was developing was directly related to a project I previously mentioned on HF

1 * 2 ???
