Thread: [\[ FREE \] Sentry MBA Config Making Service!](#)

**Sentry.MBA** - December 16, 2016, 5:30 pm

Okay so I'm going to temporarily since I've just joined to gain some knowledge and a few friends around here so I'm opening a FREE Sentry MBA Config making service.

Now because this is just a free service, I won't be doing any advanced configs, I'll be opening another thread once vouched for by a few members here offering my advanced config making services but NOT for FREE!

So if you have a basic site that you want a config creating for then please leave a message below.

NOTE #1: I'm unable to currently reply to personal messages so PLEASE leave a comment on the thread where I can quote you.

I have a vast knowledge when it comes to making Sentry MBA Configs so throw all those basic configs you want made right my way and I'll get them sorted for you.

Just remember this is only a temporary thread, once I'm established in the community I'll be closing this thread and opening as a paid service so get your configs now while you can.

NOTE #2: I DO NOT DEAL OFF SITE AND WILL NOT, SO DON'T MESSAGE ME ASKING FOR SKYPE OR ME TO ADD YOU ON ANY OTHER PLACE THAN HACKFORUMS.

Completed Request #1: segerydrth

Requested: Fitbit Config

Hello, could you please make a fitbit config, thanks

(Dec 16, 2016 06:32 PM)segerydrth Wrote: [\[CITE\]](#) Hello, could you please make a fitbit config, thanks

Fitbit is not exactly a basic config these days, Required 3 Variables but it's done since your the first person to post.

It does require some decent proxies as fitbit has cranked down on this sort of stuff.

Since it's only a basic config making service I won't be adding capture but here is your config you requested.

If you would like me to add capture to this at a later date, then please await on my paid service and I'll do that for you.

This is a nice way to give to the community. Thank you for your knowledge.

**S????i** - December 17, 2016, 3:41 am

I'm interested in this please.

My greggs config has recently expired.

here's a link to the website:

<https://www.greggs.co.uk/>

on that page, the user clicks the register/log in button on the top right and then enters their details in within the box that appears.

I would like it to capture balance and rewards if possible. The config I had said something along the lines of:

Balance: 90 Rewards: 1

meaning there's 1 reward to be claimed and the balance is 90 pence.

IF you are able to do this, I would greatly appreciate it and I would give you a very good vouch.

thank you very much

**DontWorryBeHappy** - December 17, 2016, 4:06 am

hi,

id rather be able to pm a config id like you to do because idk if i can even post it on the thread  
ik u can't pm at this moment but id like to ask u to do it and if u have time, teach me some things  
with sentry....

**PONI Walker** - December 17, 2016, 7:33 am

I need to Instagram you can give?

**Kaspah** - December 17, 2016, 7:34 am

This user is a pheony. Go to sentry.mba and then reigster and you get a lot of configs that are created daily and vouched.

**Zeno Sama** - December 17, 2016, 7:42 am

Can u make ourtime.com config?

If your referring to a config that logs in and check balance of points then I've already made it. Will check on it when I'm back home tonight.

Sorry I won't be teaching it's a free config service not a teaching service.

So I'm a pheony by having Sentry.MBA as my name and knowing how to make configs? Makes sense right? Each config made on this thread will be custom made.

(Dec 17, 2016 08:42 AM)Zeno Sama Wrote: [\[CITE\]](#) Can u make ourtime.com config?

I'll check up on that for you tonight when I'm home and ill comment back later on with a response of the config for you mate.

League of Legends is a very difficult config to make, every month they upgrade the security.

S1ckness.

**Shoto** - December 17, 2016, 10:49 am

Well then minecraft xD if thats possible ? :D

**Crowley** - December 17, 2016, 10:53 am

PM sent OP!

hope to see if you can do my request. ?

**Sickness** - December 17, 2016, 11:09 am

Can you make a MineCraft config? Will be great!

S1ckness.

I'll say this once more, I'm not offering an free advanced config making service, it's a free basic config making service.

If you would like a config for one of the more advanced sites than please wait till I've opened my paid config making service thread because right now I'm only doing basic to start my journey in the hackforums scene.

Would Asos count as an advanced config? A token in the url is set when you enter the website each time but apart from that the rest seems straightforward. No capture is required.

Many thanks!
