Thread: [Random Webm's](#)

Lone - December 17, 2016, 2:22 am

If any of you want to waste some time I created a site tonight with some webms that I have been saving. There is still some things that are missing (like skipping videos sorry too tired to add right now..)

Anyways if you have recommendations other then what I just pointed out I am all ears!

Omg thanks for sharing this site^^ so fucking funny

Cammy - December 17, 2016, 2:24 am

Your Random button just goes 1 number down in the list every time

Sorry it's random! I have it set to display the length of the array and after everytime you watch a video it removes it from the array (so you don't randomly watch the same one again) which also makes it appear as if you are just going down! Will fix tomorrow thanks

Pretty fun website. Good luck with it.

Lone - December 18, 2016, 4:06 pm

Added a forward and backwards button, uploads up to 165. Thanks for the kind words guys :).

Things I still need to add are a pause and play, sharing button, and maybe a volume control?

Lone - January 26, 2017, 12:59 am

@279 videos now, still have tweaks to do to make things nicer but I like where its at so far.

Just kidding, don't mind that. Your website is great, at least I liked it!
