Thread: [Is Nigeria blocked from accessing HF?](#)

Glyco - December 17, 2016, 9:46 pm

My friend is trying to access HF but it won't let him access the page it is giving him the error as seen below. He used to access HF just fine, but this past week he has been getting this error. He asked me to post this himself because he can't access HF.

Site Offline

HackForums.net for one reason or another didn't load. We might be offline, we might have a site error, or maybe just a serving error with our complex setup. In most cases wait a minute and refresh and we'll be back online.

Web server is returning an unknown error

There is an unknown connection issue between CloudFlare and the origin web server. As a result, the web page can not be displayed.

Ray ID: 313045deea16074f

Your IP address: 41.xxx xxx xxx

Error reference number: 520

CloudFlare Location: Amsterdam

? Quick ? - December 17, 2016, 9:47 pm

Whenever I am on a VPN I cannot log in. Maybe it is that, if he is using one.

Prepper - December 17, 2016, 9:51 pm

Nigeria is usually a country that poses threats such as phishing, spam and other threats. Nigeria is always blocked on any site I make and honestly I would not be surprised if it is blocked from here.

The list was made in 2013 and Omniscient said he will be adding to the list as he sees fit. He also said he will not edit the thread when he makes changes. Nigeria may not be listed there, but it could very well be blocked.

Vanderbilt - December 17, 2016, 10:15 pm

I dont know why, I accidentally had a vpn on and it said [403] - Forbidden, On my rdp i had this

Glyco - December 17, 2016, 10:32 pm

I even tried getting him to access a proxy server to contact Omni it wouldn't let him

It's very possible but no way to know for sure unless Omni replies to this thread.

I believe he's said there is no official list of all the blocked countries and data centers.

Take out the your ip part please, save your friend from getting attacked.

Armada - December 17, 2016, 11:17 pm

It is likely the ISP carrier that is blocked, not an entire country/region.

They are likely blocked in that region by using cyber cafes or other known threat net blocks. As already noted, Nigeria, Lagos in specific is capitol for internet scams and phishing. Its kinda ridiculous. Your friend might be best to rent a US VPS or something for connectivity if they can not find a way around the block.

Glyco - December 18, 2016, 9:51 pm

I think HF might be in fact blocking Nigeria. My other friend who is also from Nigeria is getting the same cloudflare error

B?ker - December 18, 2016, 9:53 pm

Stop having friends from Nigeria, but seriously which website doesn't block Nigeria?

Caliban - December 19, 2016, 8:19 am

I think i might have an idea why Nigerian IPs are blocked Imao

Oh, thats not racist at all

test - December 20, 2016, 12:53 am

I didn't even know Nigeria had internet.

(Dec 20, 2016 01:53 AM)testaccountplsignore Wrote: [\[CITE\]](#) I didn't even know Nigeria had internet. Imao this is some ignorant shit right here. There are many developed African cities that are much better than "some" cities in the US. Technology, etc.

Also, I think the UAE doesn't allow HF. I was in Dubai in 2014 and HF was blocked Imao.

Omniscient - December 20, 2016, 12:56 am

Nigeria is indeed blocked by HF.
