Winter Wonderland update of Overwatch published a few days ago, and with him were also 12 skins, some of them Legendary and Epic share. All skins are Christmas style, and Blizzard said that more than 100 new decorations added to the game if we include the Player Icons, Victory poses, Emotes and Highlight intros. Additionally out a video explaining the winter update, which you can watch at the end of the article. Winter Wonderland is the third seasonal update the game, after Halloween took place at the end of October. Skin is worth noting the new Emote of Zarya, it is a gift and it spends more gift and so on, as matryoshka famous doll. [Video:

Already bought Reapers. I'll probably buy Pharas, Zenyatas next. I just wish Mercy was given a Mrs, Claus skin.

Just got the game, but these skins looks sick. I'm definitely going to end up getting at least the Reapers

The pharah one is nice and cheap. Have to say, I think the Halloween skins are looking like the better set imo.

Mei's skin fits in the most. Wish some of the newer characters would get some skins though.
