I'd like to give it a shot see if people are willing to share knowledge but setting a goal on money ambition seems useless. I'll continue to learn and grow and I'll help others do the same.

If you decide otherwise, goodluck.

More so his quote states make a seemingly impossible goal yet yours is \$25,000 what does that leave people to believe mate.

-What are your aspirations in 2017 money wise?: To jump onto any business/marketing opportunities I can see fit for myself while learning everything I can.

-What successful ideas have you had to make revenue?: My successful ideas range from many topics to real life to involving online opportunities. If I gave away these ideas they wouldn't be so successful now would they. But although a lot of my starting income had come from me watching marketplace value and flipping a few items for hundreds of dollars.

-What can you bring to the sector?: I can bring a good level attitude and a entrepreneurial interest in all of the topics while generating my own discussion.

-If you are new to making money online, what makes you strive to earn?: Although I am not new to making money online at all in any way one reason I'm always striving to make money online because the opportunities it opens for my future is endless.

I personally believe that goal setting is important as it gives you something to strive for.

I do not get why you came on this thread attempting to tell me how to run my recruitment or sector, but I guess that is your business.

Kruel - December 18, 2016, 9:15 pm

-What are your aspirations in 2017 money wise?

My goal for 2017 is to make 25,000 dollars online. When I first started making money online I would have thought this would be impossible but now that I have some more experience I know this is easily achievable.

-What successful ideas have you had to make revenue?

I started earning money online in August. This was through the subreddit Beermoney. I started with the passive video watching apps and made 70\$ until I joined Hackforums in September. After I joined Hackforums I saw a thread selling a project which I immediately bought. This was the first successful project I had which paved way to my new and very profitable method. Recently I invested into some knowledge which allowed me to start making some serious money. I went from 200\$ a few weeks ago to almost 2 thousand dollars. This may not seem much to most people here who are making way more than that but it was amazing for me. I've now started to invest and buy other projects and hope to start making even more than I currently am.

-What can you bring to the sector?

I can bring a friendly attitude and some knowledge. I'm not a money making expert or even someone who is okay but I do know some things which can help others. I'm always open to helping others with many things and will always try to put them in front of myself, that's just my personality.

-If you are new to making money online, what makes you strive to earn?

I'm relatively new to making money online. I'm not really struggling with money or anything, I live a pretty nice life and don't have to worry about having food tomorrow. The reason I make money online is that I have an addiction. Ever since I've found out you can make money online I've been focusing on that because for some reason I feel like any money made online can be spent on anything so I always spend it on something I'd enjoy. I first started to get money for a 25\$ drone but I have grown into larger and better things such as investing into projects and trying to start making a living online. That would be amazing for me.

Thanks for reading through all this and I hope to hear from you soon :) Also sorry for any typos and the bad formatting, I'm on my phone right now so I'll fix all that later when I am able to get on my computer.

Current invested in a lot of different ideas right now. Spoiler ([Click to View](#))-What are your aspirations in 2017 money wise?

For 2017, I am hoping and striving to earn at least \$10k online. I'm hoping to learn something in regards to marketing and/or business within the sector.

-What successful ideas have you had to make revenue?

I'm saving up some \$ to invest my money on to resale rights of successful products or products that have good potential. I also assist with customer support on 2 different products on HackForums as well as run my own account shop here.

-What can you bring to the sector?

A friendly, positive and energetic personality. I can also share some of my ideas and offer suggestions and tips to other users, I'm personally not as professional as Juicy in the aspect of marketing but I do plan on sharing and learning within the sector.

-If you are new to making money online, what makes you strive to earn?

Money. Brutally honest, money makes me strive to earn. I use the money I earn online to bring positivity to friends and family by offering gifts and treating them to lunch. I like to look good as well by bragging about the money I earn to my friends as well ;')

What are your aspirations in 2017 money wise?

I have a few goals for the year 2017 and they are,

- Purchasing a new car at some point (99 Buick is crapping out on me)
- Being able to buy what I want without having to worry about what's left in my bank account
- Get more into reselling hyped clothing items (just started two months ago)
- Keep on building my savings account up
- Expand my knowledge of monetizing online and to meet new people that all have the same goal, making money

What successful ideas have you had to make revenue?

- In the past I ran a stresser with the user [Paran?rmal](#), was able to make a decent amount off of that venture
- Reselling clothes

I know I haven't done much but that's why I'm applying to be apart of the sector, to get more involved with making money online, meet new people and to learn new things.

What can you bring to the sector?

What I can bring to the sector is,

- Activity
- A dedicated mindset
- Willingness to learn
- A "Manager's mindset" (IRL job)
- Friendliness

If you are new to making money online, what makes you strive to earn?

What makes me strive is being able to make enough money to live a comfortable life, to be able to travel, and to give back to my family as they have done so much for me I would like to be able to repay them somehow.

Thank you for the opportunity,

What are your aspirations in 2017 money wise?

My optimal objective for the next-coming year is to achieve a rough income of \$15,000 (excluding expenses). I own a large amount of funds to my college institution which is approximately \$17,000. Though, this may be a difficult task for me to do, as the average annual income for me is \$27,600 and average expenses including food, clothes and common products are \$50,000~ annually. I will be pushing towards money as appropriately as I can.

What successful ideas have you had to make revenue?

I have done an excellent job in the buying & selling area, using craigslist/Kijiji and other famous buy & sell websites to my advantage. I buy gift cards & gift codes off other buy & sell websites and then sell them for a nice moderate resale. I have only made generally \$300.00 with very low sources of traffic, if I were to promptly email people, request ad space, put up more offers then I could potentially get a lot more money.

What can you bring to the sector?

I can bring all of my knowledge of what I know on maintaining money for college, buying & selling products and some creativity plus activity. This would increase the productivity of the group's goals by either a little bit or a lotta bit, making many people happier which should inspire them further to their goals. I often like to do giveaways, which may EVEN more - prompt people to their goals.

If you are new to making money online, what makes you strive to earn?

I always think about the more long-term goals in life, which provokes me to push. It could be getting a nice car, lovely house or even impressing the girl that I have a crush on. It always motivates me to make more money. If that doesn't work, I can hop on here, check the Bragging Rights section and see the gains people are making and get jealous, it's all about the competition, heh.

-What are your aspirations in 2017 money wise?

I finally decided this year that I would set up an online company that I have been meaning to start for many years now; having planned it meticulously I am now finalising the design of it before work goes into the coding and eventually the finance and administration side according with the law of the jurisdiction I will be operating this business in. As for more details? Well, you'll just have to wait and see.

-What successful ideas have you had to make revenue?

I've had many, I started out writing an ebook in my younger days on HackForums and now have decided to put my skills out there as a writing and assignment service for others. I have done this now for nearly a year and in the process have earned a significant sum of money. I have a good aptitude for business now because of this, but also have a practical approach having studied a large part of the law surrounding finance etc a business goes through.

-What can you bring to the sector?

My experience, my stories, my advice, and my journey. I can help beginners start up because I was once in their position too.

-If you are new to making money online, what makes you strive to earn?

I'm really not very new but having lived as a broke university student I know what it is like, and I also know how freeing it is to be able to have cash on the side you can use for whatever you want.
