I really like this piece it looks nice. The only issues I'm having is that because the render itself is do big there's only so much room for effects. The lighting is a bit overpowering too on the right side.

Oh thanks man, should i reduce the light source by abit? I'll add effects now, for some reason i wanted it clean.

I really like this one.

I think you should use a smaller brush when your doing your colored lighting. The finger has way too much pink on it for such a thin light.

I think you should remove the c4d behind his face. Bubble c4ds just dont seem to fit into this.

Any chance i can get that render?

Beautiful work.

Love the colors and also the image behind it.

NineTheGhoul - December 18, 2016, 3:57 pm

looks really nice!

maybe instead of trying to put in more glowing effects, try to use really effective placements and

positioning to give it more of a central focus.

(maybe focus on one part: ie. the eyes, teeth, cards, etc.)

good job, OP!

The lighting is 1px brush size, cant go any smaller haha :O

I agree, i think u are right about the pink statement.

Looks nice. The area around the cards is a bit rough though.

Drug Problems - December 18, 2016, 4:33 pm

This is an insane graphic. I love the colors and just the image itself. Great work on this keep up the great designing :).

YellowKief - December 18, 2016, 4:36 pm

Looks sick af man.

Keep going with this, what are you using to create the glow effects?

I just use a 1px brush and outer glow in blending options.

I do the outlining with the pen tool and my graphics tablet.

Mayy - December 18, 2016, 4:58 pm

nice work man! i could never draw this (:

Prophett - December 18, 2016, 5:02 pm

That looks nice man! Although not much difference in comparison, it looks so much better.

if this was a print i would but it

Gigi - December 18, 2016, 5:10 pm

I would say maybe take down the blue glow on the upper right a little bit. kinda distracting imo. besides that. insane job.

?ane - December 18, 2016, 5:13 pm

Great work! I really love it.

You are right, fair point.

I was just stressed on bringing the focus on the character.

done:

a big low opacity white and a cyan brush.

Is the layer set on "Normal" or like "Overlay" etc? Try setting it to soft light and playing around with those.

No it's set on screen.

I think it's fine as it is :)

But honestly tho, appreciate ur feedback on all my work.

grzegorz.trentkiewicz - December 19, 2016, 11:50 am

I love that! How you do glowing edges?

DreadPirateDrake - December 19, 2016, 12:18 pm

As has been said it's really good. Keep it up OP
