Thread: [How hard is it to hack a PHPBB3 Forum?](#)

deathkill - December 18, 2016, 8:36 pm

Hi HackForums!

Just registered here, and I want to hack a PHPBB3 forum where I'm a moderator. The current site admin ditched the forums and I need to get a position of higher power to take care of some issues. Is there any guides around on how to do so?

Reply or PM me if you can help!

Thanks!

Post the forum here and show proof you're a mod.

Since we're getting into this, I can paste a picture of my CP or something. I'd prefer to do it somewhere private though. However it says I need 25 posts to PM. Anywhere else I can talk to you in private?

Thanks for the quick reply.

Sadly, no.

Send me a pm when you get 25 posts, goodbye.

If this still needs some talking care of hmu.?

Corneliu Zelea Codreanu - December 20, 2016, 9:03 am

If you still need help I can help you. HMU with a PM, keep in mind that I can't reply back yet.

?-? ??? ????? - December 20, 2016, 9:05 am

How do we know you're actually a mod tho buddy boy? we need proof.
