Thread: [PS4 or PS4 Pro](#)

g?th - December 19, 2016, 7:51 pm

I plan on buying a 4K TV, but I don't know if the quality difference is even worth it? Should I go with the PS4 or PS4 pro? Mainly game on PC but want a PS to play GTA and shit with my IRL's.

Description - December 19, 2016, 7:52 pm

I think it's kinda stupid.

I would just go with the ps4.

Mango? - December 19, 2016, 7:54 pm

Definitely go with the PS4 Pro

SIM-3257834 - December 19, 2016, 7:56 pm

I'd tell your IRL's to move on to PC and stop investing in garbage console's.

ama - December 19, 2016, 7:57 pm

PS4, IMO no point in the PS4 pro.

Stashyy - December 19, 2016, 7:57 pm

PC

But if you're stuck on console garbage get a ps4.

PS4 pro doesn't do shit but upscale. It doesn't really show 4k it's simulated 4k. Sure it's "capable" but half the game devs are not gonna make their game 4k. Also games run at 30FPS 1080 on ps4 pro but upscaled to 4k. Which drops a few frames. Not worth it. If you're still going to get a ps4. Get a ps4 slim.

No use, for some reason they won't go past laptops that can barely run CS.

You've honestly got some stupid IRL's then. Not sure why people set their standard low with CS another garbage game on par with overwatch.

CULTURE - December 19, 2016, 8:02 pm

If you have the money I would get the PS4 Pro because of the 4k shit. If your getting the PS4 Pro maybe you can save money buy not buying a smart TV since the PS4 Pro has a lot of media shit on it.

This right here. A PS4 Pro isn't worth it. They say all these nice features, but you won't even really get the full value out of them.

Tell me about it. ?

Psilocybinaut - December 19, 2016, 8:04 pm

I know someone who bought the PS4 pro and sold me their PS4, they have a 4K TV and say it has a really really big difference. Said it's phenomenal.

imbeds - December 19, 2016, 8:04 pm

I heard that PS4 Pro with Infinity Warfare + 4K TV = Most insane graphics you'll have ever seen

One of my friends showed me a picture of the graphics, I thought everyone was real.

Crake - December 19, 2016, 8:07 pm

PC. But also PS4 pro graphics aren't actually any different, it's like how the wii just stretched 720p to 1080p

Might want to get your eyes checked if you honestly think a game with a garbage engine like IW looks anywhere real. Next thing you'll tell me is everyone on borderlands looks real.

lol

ps4 slim can still put nice images on a 4kTV

Ps4 will never put out a 4k game because the ps4 can't even do 4k. It's simulated upscaled 4k.

Stick with the PS4 slim if you really want a ps4. Fuck the ps4 pro. Frames drop like crazy when you're using it.

BR?ND?N - December 19, 2016, 8:26 pm

I own a PS4 and it's fine tbh. I don't see a reason to go pro.

ImZero - December 19, 2016, 8:54 pm

Ps4 pro isn't work the extra price.

DOG - December 19, 2016, 8:55 pm

Buy Xbox bro better than PlayStation

g?th - December 19, 2016, 8:59 pm

That's not true and the people I want to play with are on PS.

Revurb - August 17, 2017, 12:31 am

I've been a PS4 user for 3yrs now & haven't once considered the pro until I got into Ark survival, very large map open world kind of game - the draw distance alone is so crucial on that game (to not run into a base for example) that I truly have considered upgrading to the pro, but aside from that I see the performance of the two consoles rather parallel to be honest.

This post is almost a year old

SIM-2228224 - August 17, 2017, 12:39 am

Obvs PS4 pro if you're a fanboy with the extra cash to waste. PC if you're a true gaming enthusiast. Can't lie though, some of those exclusives are tempting. The new Uncharted looks pretty sweet.
