Yes I changed my username from Sleeping Monk to Flucci, whats wrong with that? And yes I changed my username from jeneiv on chat to BigBear, also, whats wrong with that? You make it sound like I ripped off some bux and trying to cover it lol. Dont be ass-hurt for being kicked because you ripped off every single layout I had on my server on Discord, starting from contest to channel names. But then again, I dont mind your spam anymore, more bumps on my topic, better coverage. Thanks again ?

I didn't rip off shit, The Underworld was existent before your crap. If anything, you ripped us off.

As for your change of usernames, it's quite obvious you're trying to disguise and trick people who know your shitty reputation under your old names, into thinking this is a new or different chat room.

Same old shit, same old person

Monero is very likely to be added to Coinbase, hence, Coinbase integration, Jaxx wallet integration, and official GUI release are going to shoot Monero really high up. Make sure you have some XMR in your blockfolio.

No, i think zcash technology could cause monero marketcap to switch places with zcash. monero hasn't even moved this january, and there is absolutely no way they will add it to coinbase with anonymity problems.
