Thread: [\[BLACKHAT\] How to STEAL SCOOTERS - MAKE MONEY \[XMAS SPECIAL\] \[PROFIT\]](#)

SwagotMcFaggot - December 21, 2016, 5:14 am

I've seen a lot of bullshit on the Hackforums market and I'm here to introduce a new and original method to the Ebook scene.

This is a detailed and constructive method on how to steal scooters and profit.

What will this method include?

- Detailed and descriptive tutorial on how to pick scooter locks
- Tutorial on how to properly disassemble a scooter
 - how to sell parts of it for cryptocurrency PayPal, and other payment methods
- Where you can sell these scooters and make PROFIT.
- How to properly handle people who want their scooters back
- Complete anonymity and detracing (so the feds can't find you)

Pricing?

I know the financial struggles of users on HF,
And I've decided to do my part in giving back to this community.
We will be having a Christmas sale,
Selling copies of this ebook for a limited time offer of \$5 a copy.

Now keep in mind,
I will not be held accountable for anything you use this method for,
And that this ebook is for educational purposes ONLY.

Yes, misguided users will hate on this product.

However, it's important that you note this is ONLY because they're simply scared of the competition this method will bring to the market.

You can contact me via. PM or Skype: remix.michi
Merry Christmas HF,
Hope to see you all make a purchase
