Thread: [Project paused.](#)

KING - December 21, 2016, 9:20 am

Project has been paused for unknown time.

Patrick Jane - December 21, 2016, 9:25 am

Vouch for my boy KinG, amazing guy with amazing products!

Academy Awards - December 21, 2016, 9:37 am

Great dude with all HQ products! Nice crypter.

Slavoj Žižek - December 21, 2016, 9:45 am

Really sexy thread.

Whats it coded in?

What does it bypass?

Good luck with sales!

Mad76e - December 21, 2016, 9:53 am

Very nice thread, indeed. Vouch for my friend King

Katarina Du Couteau - December 21, 2016, 10:08 am

AWESOME Crypter man!

Best of luck with the sales!

Patzan - December 21, 2016, 10:10 am

Hell, looking fcking awesome.

GLWS.

Wyatt Garcia - December 21, 2016, 10:13 am

Awesome crypter, never seen such one for that cheap.

GLWS, my vouch.

Stixio - December 21, 2016, 10:16 am

Good luck with selling this homie!

God - December 21, 2016, 10:35 am

Good luck selling, thread design looks great man.

KING - December 21, 2016, 12:42 pm

(Dec 21, 2016 10:45 AM)Blezzedd Wrote: [\[CITE\]](#) Really sexy thread.

Good luck with sales!

Stub is coded in Delphi and Client in VB. It can bypass all AV's,UAC etc.

TopKekeroni - December 21, 2016, 12:56 pm

Using this, works amazingly.

KING - December 21, 2016, 1:58 pm

(Dec 21, 2016 01:56 PM)TopKekeroni Wrote: [\[CITE\]](#) Using this, works amazingly.
Thank you for purchasing Exterbyte. ?

Strictly - December 21, 2016, 2:46 pm

Thread design looks amazing. GLWS!

DeluxeSoftware - December 21, 2016, 2:52 pm

(Dec 21, 2016 01:42 PM)KING Wrote: [\[CITE\]](#) Stub is coded in Delphi and Client in VB. It can bypass all AV's,UAC etc.

I highly doubt it can bypass all AVs on runtime. What UAC bypass method is used? Eventviewer?

and good luck with sales!

TheWHO? - December 21, 2016, 2:53 pm

I like the design, good luck with sales.

Greg???????????????? - December 21, 2016, 3:00 pm

Seems like a nice product. Have dealt with o.p in the past and he's made me gfx.

©**Ratatouille™** - December 22, 2016, 3:09 am

(Dec 21, 2016 01:42 PM)KING Wrote: [\[CITE\]](#) Stub is coded in Delphi and Client in VB. It can bypass all AV's,UAC etc.wow delphi good job !

size is ?

Good luck !! ?

KING - December 22, 2016, 6:04 am

If you have any question please contact via PM or Skype.

This is sales thread only. Thank you!

Juicy - December 22, 2016, 10:02 am

Nothing but high quality products from this dude!

ImZero - December 22, 2016, 11:19 am

Vouch for this crypter, king crypted my file for me and it was flawless :)

KING - December 22, 2016, 1:48 pm

(Dec 22, 2016 12:19 PM)ImZero Wrote: [\[CITE\]](#) Vouch for this crypter, king crypted my file for me and it was flawless :)

ImZero - December 22, 2016, 3:08 pm

Hey thread says lifetime is \$120 but it's \$200 on rocketr

KING - December 22, 2016, 3:23 pm

(Dec 22, 2016 04:08 PM)ImZero Wrote: [\[CITE\]](#) Hey thread says lifetime is \$120 but it's \$200 on rocketr

Thank you for reporting. Bug has been fixed. ?

GhostintheShock - December 22, 2016, 6:29 pm

Purchased it today and sent you PM, please check it.

Edit: Confirmed, it is FUD. Great crypter. Have good experience with Delphi crypters and have seen one after a long time.

Great one, vouched.

Malicious Intent - December 22, 2016, 6:36 pm

Looks promising. Wonder how it works runtime. Good luck with sales.

ImZero - December 22, 2016, 6:44 pm

Just bought this, will update with a review.

Codefuser - December 22, 2016, 8:32 pm

What UAC bypass are you using? And by "Support x32 and x64" do you mean supporting 64 bit payload or 64 bit systems? (it is x86 and not x32 btw)

KING - December 23, 2016, 2:40 am

(Dec 22, 2016 09:32 PM)Codefuser Wrote: [\[CITE\]](#) What UAC bypass are you using? And by "Support x32 and x64" do you mean supporting 64 bit payload or 64 bit systems? (it is x86 and not x32 btw)

I have mentioned early that this is sales thread. Just PM or contact via Skype for any questions you have.

Thank you,
-KinG

Codefuser - December 23, 2016, 2:54 am

(Dec 23, 2016 03:40 AM)KING Wrote: [\[CITE\]](#) I have mentioned early that this is sales thread. Just PM or contact via Skype for any questions you have.

Thank you,
-KinG

Then PM me the answer. I will be waiting for it.

Malicious Intent - December 23, 2016, 3:01 am

It sounds sketchy that all this info can only be obtain by pm. Why can't you tell everyone on the sales thread? If it was so good why not?

KING - December 23, 2016, 4:52 am

(Dec 23, 2016 04:01 AM)Malicious Intent Wrote: [\[CITE\]](#) It sounds sketchy that all this info can only be obtain by pm. Why can't you tell everyone on the sales thread? If it was so good why not?
I'm sorry that's my policy. ?

GhostintheShock - December 23, 2016, 5:38 am

One of the best FUD crypter available on HF. Because it is Delphi I can guarantee its the best. Had some issue with crypting, support team has helped me quickly over TV and it is resolved. The issue was related to RATs I am using and not with the crypter. It is the best, don't hesitate to buy it.

Support person was very polite and helpful so not only you will be getting good crypter but awesome support as well.

Vouched+

Must buy. Worth it.

KING - December 23, 2016, 6:53 am

Please check I have replied you.

Latest scan: [12/23/2016]

ImZero - December 23, 2016, 11:12 am

This is my review, I am in no way affiliated with exterbytes or it's coders.

Design

9/10 The design of the crypter is astonishingly good.

Features

7/10 this crypter has all the features you need + more

Detection rateSo far it's been fud even though i have been spreading, seems pretty good.

Overall

8/10 this crypter is amazing.

KING - December 23, 2016, 3:43 pm

How are u using it 5th day? There is so many things that dont add up with these fake vouches...

What were you promised for saying this?

KING - January 12, 2017, 3:32 pm

News [1/13/2017]:

New beta version has been released. To be beta tester you must be old customer. Contact our support via Skype for more details. [New customers cannot participate in beta.]

New features:

Inject custom process:

- Automatic injecting added
- WerFault added

Others:

- Anti Wireshark added
- Anti Task Manager added
- Anti Regedit added
- Anti Anti Msconfig added

-New GUI Preview:

Changes in prices:

- 3 Months Plan removed (This is only for new customers. If you already have 3 Months plan you don't have to worry about anything.)
- 6 Months Plan removed (This is only for new customers. If you already have 6 Months plan you don't have to worry about anything.)

- 1 Month new price: \$14.99 USD
- Lifetime new price: \$149.99 USD

(Paypal is temporarily suspended. It will be back within approx 1-2 days.) Bitcoin is working fine.

We're moving away from Netseal to our own Custom system. Notification will be sent soon to all customers for upgradation.

Verification is now must for all new customers. If you're not approved your membership will be cancelled and refund will be given to you (If you're already on our blacklist you shouldn't buy our crypter as we will be not giving any refund to any blacklisted member and your membership will be cancelled.) All those members who used to leak our stub on Virustotal and other virus distributing websites you better stay away from our crypter. Because we have implemented very strict policy and verification process now.

I don't compromise on quality of product. If you're facing any issue just contact our support via Skype. They'll help you. If they don't help you for any reason. Just message me directly with your problem and Skype username. I will personally help you!

Within few days I'll make video showing power of our crypter. If you have any question feel free to pm me!

VisualSoft - January 12, 2017, 11:55 pm

Crypter looks really good,
Best of luck with sales.

GhostintheShock - January 13, 2017, 4:58 am

This is great news man. Looking forward.

The crypter is working great for me now like even after not upgrading for 8 days I am still getting 98% of bots.

DexterGO - January 13, 2017, 5:47 am

It's great it was already very well before ;-)

PVPMinersDE - January 23, 2017, 7:42 am

Awsome crypter! Fully undetectable at least on scantime :) will also check for runtime

*****Wolf***** - January 23, 2017, 8:14 am

Best ever crypter and support team, i use it many ..many crypter from HF but no one it's like this one, thanks Extrebyte team , keep up with good work!

Riddick - January 23, 2017, 9:52 am

Does this get the stubborn ESET detection? Also, what's it like runtime, any detections there?

KING - January 23, 2017, 9:56 am

(Jan 23, 2017 10:52 AM)Wapix74000 Wrote: [\[CITE\]](#) Does this get the stubborn ESET detection? Also, what's it like runtime, any detections there?

Yes, Bypassing ESET and all other best AV's on runtime. :)

Riddick - January 23, 2017, 10:04 am

(Jan 23, 2017 10:56 AM)KING Wrote: [\[CITE\]](#) Yes, Bypassing ESET and all other best AV's on runtime. :)

Thanks for the fast reply, your font colour makes my eyes happy ?

I am going to post my experience thus far.

I bought the crypter and it was delivered instantly along with the licence key. The crypter opened without any issues, the licence key was accepted and the crypter updated quickly. This is one of the

most appealing GUIs I've experienced, I like everything about it and the crypter is very responsive.

Here's comes the main part of my experience so far. I crypted a NanoCore file with ExterByte, scanned it and guess what happened. KinG advertises this as FUD..... and rightly so! The file received no detections, but works/connected perfectly.

Big vouch.

Forgot to mention: KinG responds to the thread and PMs quickly too.

No, You shouldn't be getting even 1 detection. You're getting that random detection because you're not using custom icon. To get zero you must use custom icon.

Just did a quick test:

Latest scan [1/23/2017] 0/38:

When a standalone .exe is opened, AVG becomes paranoid. There's nothing to worry about because no detection is made. I think the scanner being used is mistakenly thinking that the above pop up is a detection, when it isn't.

KING - January 23, 2017, 7:08 pm

Our crypter is bypassing all AV's on runtime. If you're having problem with anyone. Please contact our support asap.

Riddick - January 25, 2017, 3:23 pm

(Jan 25, 2017 01:26 PM)TanByv Wrote: [\[CITE\]](#) I own the crypter ESET doesn't detect the file on Scantime how ever it detects it on runtime but cannot delete it. Also about other runtime detections only I found was AVG other than that bypasses all with detections or not.

I use this crypter and have no detections on scantime or runtime. The AVG runtime "detection" isn't actually a detection, but a false positive. AVG will scan stand alone exe files because it's "suspicious" but when the scan is complete it says the file is safe and executes it normally. This crypter is 100% FUD.

KING - January 25, 2017, 3:43 pm

(Jan 25, 2017 04:23 PM)Wapix74000 Wrote: [\[CITE\]](#) I use this crypter and have no detections on scantime or runtime. The AVG runtime "detection" isn't actually a detection, but a false positive. Hey, do you use a public exploit for UAC bypass, if so what CVE number. Thanks!

awaping - January 28, 2017, 5:40 am

Hi, someone has a tutorial to use it with LL?

Thanks

legionreal - January 28, 2017, 10:25 am

I have installed the crypter, then I started it and then came the update and it re-started and then it crashed and had 0kb.

Help? Crypter doesnt work..

All AV's are disabled and Firewall is also disabled, so nothing can block it.

EDIT : It is working now. Thanks to the Support <3 Sorry for posting it on your thread.

I re downloaded and cant find a password for rar. Whats that?

Riddick - January 29, 2017, 2:11 pm

This is just a suggestion, but an update/news tab in the crypter would be awesome. Sometimes we log in and there's an update and we don't know what has changed.

eHate - January 29, 2017, 4:05 pm

Does anyone know if this crypter has a spoofing feature built in?

Riddick - January 29, 2017, 4:24 pm

(Jan 29, 2017 05:05 PM)eHate Wrote: [\[CITE\]](#) Does anyone know if this crypter has a spoofing feature built in?

Not yet, however the author is constantly updating the crypter and does take suggestions from customers on board. At the moment, the main focus of this crypter is the FUD aspect, which I can personally vouch for. I haven't had a single detection since I've had the crypter and that's including both scan and run time aspects.

eHate - January 29, 2017, 5:12 pm

(Jan 29, 2017 05:24 PM)Wapix74000 Wrote: [\[CITE\]](#) Not yet, however the author is constantly updating the crypter and does take suggestions from customers on board. Your payment must be flagged by Rocketr and you will have to manually verify yourself to get your key. (This happens in very rare cases)

zehnhacker - February 3, 2017, 4:33 pm

(Feb 3, 2017 05:28 PM)KING Wrote: [\[CITE\]](#) Your payment must be flagged by Rocketr and you will have to manually verify yourself to get your key. (This happens in very rare cases)

I understand. I'm very sure it's because i use a VPN.

But if someone asks me for my Teamviewer information, i get suspicious. (the only reason someone would want this is to take control over my computer)

How would you want me to Verify myself? You need my ID-Card?

Because i'm not doing that for obvious privacy reasons.

If there's nothing you can do for me, would like to get a refund.

I hope you understand.

KING - February 3, 2017, 4:40 pm

You shouldn't have use VPN when making payment. This is why your payment was flagged by Rocketr. Manual verification is necessary (Not your ID-Card). One of our staff member will check and make sure that it was you who made that payment via Teamviewer and if you managed to satisfy him you will receive your key instantly. If you don't want to go through our verification process you can just open case on PayPal. As we have no refund policy.

zehhacker - February 3, 2017, 4:50 pm

(Feb 3, 2017 05:40 PM)KING Wrote: [\[CITE\]](#) You shouldn't have use VPN when making payment. This is why your payment was flagged by Rocketr. Manual verification is necessary (Not your ID-Card). 3.Awesome guy to talk with.

4.Outstanding crypter.

5.Keep up the good work King.?

xmpincognito - February 4, 2017, 8:36 am

(Feb 3, 2017 05:50 PM)zehhacker Wrote: [\[CITE\]](#) " satisfy him you will receive your key instantly. "

Making someone satisfied is subjective. His perception may differ from mine. You are basically keeping me and my money hostage. I think this is a bad thing.

Because you are not willing to help me, i'm forced to get a refund trough Paypal.

I have been a HackForum member since 2012 and never have i felt so "scammed".

If you knew anything about teamviewer, you would know that there is nothing they could do to your computer without you seeing it all take place in front you. Not to mention you can close off the connection at any second that they seem to be acting suspiciously.

This is the best crypter you'll find at this price hands down. You won't find another crypter close to its quality for a price less than \$30-\$35. If your tiny little \$12 is so important to you than you should probably do both of the following:

1. Let them use teamviewer to verify the purchase
2. Get off the computer and get a god damn job

Quit complaining. You aren't going to find a better deal anywhere else. It's not like he is having you install a rat on your computer... I am seriously concerned for a large majority of people on these forums... Surprised they even have enough brain cells to survive.

Malicious Intent - February 4, 2017, 8:49 am

gwen.kim98 - February 4, 2017, 1:10 pm

there is diffrent for 11\$ version and another version ?

MasterRankam - February 4, 2017, 1:23 pm

(Feb 4, 2017 02:10 PM)gwen.kim98 Wrote: [\[CITE\]](#) there is diffrent for 11\$ version and another version ?

11.95 \$ = 1 month sub

79.95 \$ = Lifetime sub

Riddick - February 4, 2017, 1:47 pm

My ExterByte Review

Detections: ExterByte is second to none when it comes to avoiding detections. I'm not exaggerating when I say every file I've crypted with ExterByte has been 0/35 (scan time and run time).

Updates: KING delivers timely updates (usually multiple times a week) and he really listens to his customers. For example, one of his customers executed a file he crypted with persistence enabled, but the persistence was so strong that the customer couldn't remove it. KING then implemented a removal tool within his crypter in the next update.

Design: I think the design of the software is beautiful. The colours, the layout, everything. It's very sleek and looks as good as it performs. I even sent KING a PM asking him to never change the design, lol.

Compatibility: I have no known compatibility issues to report. I've tested both native and .NET crypts on most Windows systems ranging from XP all the way up to 10 (both x86 and x64) and it was very stable. I was also able to test this on a Windows Server 2003 x64 machine and it worked flawlessly.

Support: The support team are very responsive on Skype and they seem very knowledgeable on not just their own software, but also third party software, such as RATs, etc. They are very patient and friendly to chat with as well, which is always a bonus.

Features: What I really like about ExterByte is that a lot of the magic is done in the background, it doesn't go into unnecessary detail. Some crypters can be a bit confusing with lots of features that aren't even needed and are just there to try to look impressive. ExterByte simplifies everything and still produces stable and FUD results but retains all of the important features.

Price: The price speaks for itself. I initially paid \$11.95 because I've been burned by crypters in the past, but I have no doubt I will be getting lifetime when my month expires.

Conclusion: I genuinely believe this may be the best investment I've made on HF. It's one of the very few purchases I've made that I haven't regretted what-so-ever. If you're reading this and you're looking to buy a crypter, do yourself a favour and buy this one!

baazouzia411 - February 4, 2017, 3:10 pm

Does it bypass nod32 runtime ?

Riddick - February 4, 2017, 4:15 pm

(Feb 4, 2017 04:10 PM)baazouzia411 Wrote: [\[CITE\]](#) Does it bypass nod32 runtime ?

Yes, I can vouch for that, along with other AVs both scantime and runtime ?

Does this come with a binder?

(Feb 17, 2017 08:00 AM)accelsol Wrote: [\[CITE\]](#) In how many days the file needs to be re-crypted ?
Depends. Ive had files become detected anywhere between one week, and 3 months. All depends on who obtains your file and is quickly to distribute it to such sites as Virustotal.

Godofdeathftw - February 17, 2017, 3:34 pm

Can this crypter change the file type, along with the image or the download?

KING - February 17, 2017, 4:45 pm

(Feb 16, 2017 05:34 PM)MattGates Wrote: [\[CITE\]](#) Does this have support and does it work worldwide?

Yes sir.

(Feb 16, 2017 11:52 PM)princesammy03 Wrote: [\[CITE\]](#) Hello, please does this works with Luminosity Link?

I wish you could read thread properly. Yes, Luminosity Link is supported.

(Feb 17, 2017 11:52 AM)Bloodfoldx Wrote: [\[CITE\]](#) Does this come with a binder?
Yes, We do have built in binder.

(Feb 17, 2017 04:34 PM)Godofdeathftw Wrote: [\[CITE\]](#) Can this crypter change the file type, along with the image or the download?

Yes, You can change extension after crypting.

Riddick - February 25, 2017, 5:04 pm

Here's a quick video I made showing ExterByte bypassing Avira Antivirus Pro on both scantime and runtime (it's best to watch the video in full screen and HD to see everything clearly). This operating system is a fresh installation of Windows 10 Enterprise (x64) with no changes, except for the installation of Avira Antivirus Pro.

Please bear with my slow laptop, it can barely run its own OS, let alone a second one in VMWare ?

If anybody would like me to do more videos with different AVs, let me know and I'll do what I can when I get some free time.

jkrstar - February 25, 2017, 7:00 pm

Have been using for three days. Works just perfect.

Awsome support guy. Very helpful.

What is this crypter coded in? RunTlme FUD???

Riddick - March 2, 2017, 1:24 pm

(Mar 2, 2017 01:45 PM)whendarknesscomes Wrote: [\[CITE\]](#) What is this crypter coded in? RunTlme FUD???

The stub is coded in Delphi and the client in VB. It's scantime and runtime FUD, including UAC bypass.

KING - March 2, 2017, 4:24 pm

That's not true. Our stub and client both are coded in Delphi. ?

One of the best and cheapest FUD cryptors you can find in the web. Awesome quick customer support which can help you with any kind of problem, even with properly setting your RAT to make it more stable in the stub. Overall, the cryptor has big functional except for few minor bugs, which are not even noticeable. Recommend to buy it for everybody!!! 9.5/10

gjackson5121 - March 9, 2017, 6:57 pm

Hi, I purchased your crypter last week and the email that I got from the payment system was blank. I sent you a few emails but havent heard anything back. Any chance you could take a look at my order and send me my account info? Thanks!

Jojeli - March 11, 2017, 12:52 am

I would hella recommend this crypter, bought yesterday and got it instantly working! Support is the best i've seen so far... Has the simple features a crypter needs and is FUD! What can you even say... nothing because this is so good!!! :)

9inchn4il - March 11, 2017, 8:31 am

not too good on luminosity..startup option not working.

I do not think I have offended you..... , and I'm not the advocate of anyone, I simply said what perhaps Skype fix it before, I just tried to be helpful, but sometimes better not to help some people .

good day.

KING - March 21, 2017, 6:23 pm

Unfortunately we are having hard time to push re-FUDs at the moment. As it takes approx 1-2 hours to re-FUD. At the moment our more focus is on new stub. We are working hard on new stub to handle our large database. It will have USG feature to offer much more longer FUD and much more stability.

We are still sending re-FUD's to our current stub but not as often as we used to. Due to being so much busy with new one.

I apologize for not being active as much I used to be. I'm very busy with exams so that's why it's very hard for me to manage, check and make sure that everything is running smoothly.

Best regards,
-KinG

Yuno - March 21, 2017, 6:38 pm

Any idea when the new stub will be released? Also when will this become FUD again?

KING - March 21, 2017, 6:41 pm

(Mar 21, 2017 06:38 PM)Yuno Wrote: [\[CITE\]](#) Any idea when the new stub will be released? Also when will this become FUD again?

Just did re-FUD. Should be all good for now. New stub will be released within 1-2 months.

KING - March 21, 2017, 6:53 pm

(Mar 21, 2017 06:48 PM)Friedrich Nietzsche Wrote: [\[CITE\]](#) I am not sure whether this is correct or not, but a public crypter with this size of customer base would definitely never reach 1-2 months of FUD time.

Even a private crypter used by 1 person doesn't reach that FUD time.

Please read it again. I said: "New stub will be released within 1-2 months". I didn't said that the new stub's fud will last 1-2 months.

KING - March 21, 2017, 7:01 pm

(Mar 21, 2017 06:59 PM)Friedrich Nietzsche Wrote: [\[CITE\]](#) Then between that time it will be unFUD? That's what I am confused about.

I gues English isn't your first language. Please use a Google translator to understand my statement better in your native language.

I have clearly mentioned in my statement:

Code We are still sending re-FUD's to our current stub but not as often as we used to. Due to being so much busy with new one.

Twistd - March 21, 2017, 7:23 pm

(Mar 21, 2017 07:10 PM)Friedrich Nietzsche Wrote: [\[CITE\]](#) It seems like YOU are the one who doesn't understand malware terminology. If you are still sending reFUDs, then new stubs are sent everytime the old stubs go unFUD. It seems like you are referring to an USG, which is not a stub, but a STUB GENERATOR.

Refrain from dissing people who knows more than you please. also "Google translator" is actually Google Translate and it is uncountable.

This reply just made my day! :)

i bought this crypter and i get Zero clients i have tested it with netwire, darkcomet, njrat and nanocore. i wrote King on several occasions he didn't respond or bother to help. i have to beg a friend to crypt my nanocore with Kazycrptter and i get few clients. i regret buying this crypter even at 0/35 scan result you will get Zero client.

James240901 - March 28, 2017, 3:30 am

(Mar 28, 2017 03:08 AM)don401 Wrote: [\[CITE\]](#) i bought this crypter and i get Zero clients i have tested it with netwire, darkcomet, njrat and nanocore. i wrote King on several occasions he didn't respond or bother to help. i have to beg a friend to crypt my nanocore with Kazycrptter and i get few clients. i regret buying this crypter even at 0/35 scan result you will get Zero client.

Im not disagreeing with you, exterbyte isnt exactly the best on the market and krazycrypter is really good compared to exterbyte, but buying a crypter doesn't mean you will immediatetly start making slaves. Thats down to you to spread your rat and get installs. Trust me its hard to begin with but give it about three days with non-stop spreading and you will have a reasonable ammount of installs and slaves??

don401 - March 28, 2017, 3:53 am

(Mar 28, 2017 03:30 AM)James240901 Wrote: [\[CITE\]](#) Im not disagreeing with you, exterbyte isnt exactly the best on the market and krazycrypter is really good compared to exterbyte, but buying a crypter doesn't mean you will immediatetly start making slaves. Thats down to you to spread your rat and get installs. Trust me its hard to begin with but give it about three days with non-stop spreading and you will have a reasonable ammount of installs and slaves??

Thanks for you response. But my spreading method is cool and it has been working for me and also got me clients when i crypt with Kazy . it has been more than 2weeks i have tried different setups. i test it and also remote run and execute on existing clients and i m not impressed with this Crypter. But it works for my friends that have LL. So for me to use this product i have to buy LL like my friends. the issue i am having is not spreading but the crypter that i am using. i invested my BTC so i have to wait till next week to buy another crypter. its really frustrating cause i wasted my money on

this Crypter.

KING - March 28, 2017, 6:54 am

(Mar 28, 2017 03:08 AM)don401 Wrote: [\[CITE\]](#) i bought this crypter and i get Zero clients i have tested it with netwire, darkcomet, njrat and nanocore. i wrote King on several occasions he didn't respond or bother to help. i have to beg a friend to crypt my nanocore with Kazycrpter and i get few clients. i regret buying this crypter even at 0/35 scan result you will get Zero client.

1st of all you never pmed.

2nd Most likely you're not using proper settings. That's why you're not getting connection back.

Do not blame a crypter when you don't know how to use it properly. Solution to your case is that private message me your RAT and Crypter settings screenshots.

Admitting that you're mass-spreading is probably going to bite you back in the butt. Most crypters do not allow mass spreading, and sometimes they don't even allow the user to use the crypter in a malicious way. That being said, I wouldn't be surprised if your license gets terminated/other crypters don't sell to you. Be careful with how you spread and who you tell ?

To OP: Great crypter and positive feedback! GL with sales!

I just checked your file and it's executing fine. Your issue is most likely due to problem in your DNS/Port.

1st of all if you need help on how to use crypter. You're supposed to private message me. You're not going to get any support here on thread. 2nd refud was done today. Re-crypt your file and use proper FUD icon to get 0/35. 3rd the error you have posted is that: Incorrect username/password. How do you call it ban? We do not our customers if they don't do anything against our policy.

Earthapple3 - March 29, 2017, 11:47 pm

Hi,

I've used your crypter for quite a while now and I actually like it alot..

Now my question for you guys, which are the settings which make my virus as undetectable as possible? I'm trying to get it right but I can't for some reason. When I scan my file (With NoDistribute, dw) it sais 8/35... What am I doing wrong? Thanks in advance,

Earthapple3.

EDIT: In one case I used an icon, in another case I didn't, same results..

H4x10r - July 11, 2017, 11:32 pm

Not able to use the crypter till 2 days now no account no extra info how to get one or anything

so please again make me a account or send me a pm how to do it
i want to use the cypter i bought 2 days ago thanks

now im a pissed off user really

evilcode1 - July 12, 2017, 1:36 am

not able to use the crypter 2 days now !

im asking the owner to re-set my HWID cuz i change my computer , and no answer till now !

H4x10r - July 12, 2017, 2:06 am

Know the pain BRO

sugesstion here is not to buy this product ... easy as it is sorry for that but FACT

I am happy that i dont ordered the lifetime , it wolud be lifetime abfuck

If possible i would like to have the btc back waiting now too long the service btw support is not helpful , also the delivery is not clear , got the crypter and serial but no account etc....

other crypters you buy online , are directly usable... not waiting days and get no reply and so on

I dont understand what's wrong with you, First you had issue with Rocketr you blamed that on us,
Are you buying crypter for very first time? It's very easy and simple process, With your serial key you get download link for client. Download that, Open it and click on Sign up, Enter your details and you're ready to go!

Next time contact via Skype if you have any question. Thank you!

? BL4ZE - July 12, 2017, 9:27 am

Not able to use the crypter, Contacted the support through skype and still waiting for reply.

H4x10r - July 12, 2017, 9:54 am

Aha where is my feedback ? So u delete negative posts
Nice to see

Write him on skype, ones he comes online on skype, he reply all messages..
Thanks

Please who else is using Quasar Rat here, please how did you crypt your file, which Injection did you use?
being trying to crypt my Quasar but is not reporting after crypting, and i have tried auto dictate and self injection.
but my NJ Rat is working perfectly okay, likewise my Imminent.

Pe?cil - July 13, 2017, 1:16 pm

Hey

Just asked you in PM but maybe members would like to know also.

1 - So, do I need to use the "Patch PBE and/or Protect Memory (not good for net rat it seems)" options to bypass (runtime) Avast/Avira/McAfee properly or it is optionnal only ?

Thanks for your support.

NB : My rat is a private rat, but with high detection rate actually (build in 2014).

but my NJ Rat is working perfectly okay, likewise my Imminent.
Please use .NET 4.0 injection for Quasar RAT. It will work fine!

(Jul 13, 2017 01:16 PM)Lilinode Wrote: [\[CITE\]](#) Hey

Thanks for your support.

NB : My rat is a private rat, but with high detection rate actually (build in 2014).

PEB: It makes harder for a AV to check if the file was executed with a runpe.

Protect Memory: It helps to bypass memory scanners, It will work great with all native but not with all .NET due to compatibility issue and it will end up crashing your stub. So it's not recommended on .NET rats.

Subaat - July 14, 2017, 12:16 am

I m happy with this, i encouraged it, this is so far best crypter for me.

Huge vouch for the crypter.

Thank you.

Hi. I'm planning to buy your crypter.
Can you accept my contact request on skype --> DaKeng808
I have questions.
Thanks!

antex - July 23, 2017, 8:34 pm

Hi all,
I bought this cryptor,
but,
My file - Smoke Loader
After crypt does not work.
I explained everything to the seller,
And he replied - "We do not provide support for Loaders"
I asked to return the money and close the account.
He refused to make a refund.
Think before buying.

(Aug 14, 2017 05:02 AM)narc0tic Wrote: [\[CITE\]](#) How does the USG work?, I'm interested.
The way it should.

(Aug 15, 2017 02:51 PM).Jasper Wrote: [\[CITE\]](#) Lmfao

Uses winrar for USG, absolutely hilarious

OP posted screenshot of ExterByte file. Which used SFX compression. Codex is a different from ExterByte and it has nothing to do with Winrar, 7-zip or whatsoever. Output result is pure raw no any type of compression or anything like that is applied to output file.

arafat1111 - August 15, 2017, 4:21 pm

Is this crypter working with LOKI BOTNET?

W00F - August 15, 2017, 9:35 pm

Has anybody used this with Imminent Monitor? I think I'll buy soon!

Steen? - August 16, 2017, 1:06 am

Just purchased but i'm not receiving any mails with the download etc? i can PM proof OP

Birdyy1 - August 16, 2017, 6:35 am

After a few days testing this crypter, it complies with what is said and it seems excellent, buy it for a month but I will definitely renew it for a lifetime.

Great job! Very satisfied

Fire_Star - August 19, 2017, 2:28 am

Sent you a PM KING, Kindly have a look at it.

B4NN3D - August 19, 2017, 5:58 am

for some reason every single file gets detected for me

SlowMehMo - August 19, 2017, 7:24 am

Relax my dude, he will get back with ya, he might be investigating your issue, or updating things, also remember its the weekend and he has a life too. idk about you but its caturday and im getting drunk. lol

Milan Hermanus - August 20, 2017, 6:37 am

"Patch PEB"

What do you patch?

isn't 1.5mb a little large for a crypter output? especially if it's "just delphi", i find that hard to believe

Ofcourse yes.

mistoflegend - September 13, 2017, 6:53 pm

Sir, you're the coder of the exterbyte crypter right? Is there any way for the customers of the exterbyte who purchased the lifetime package to still be able to get hold of this? I haven't used much the exterbyte and have really like it, unfortunately it was gone when I was about to use it back again. So far the best crypter I owned. FUD all the time, I still have the proof of purchase ready if needed.

Universe_X - September 14, 2017, 4:04 am

KiNG it's actually true. Crypter has been giving out error when attempting to execute the crypted file. I jus realized that this has been happening the past several updates of yours, hence the reason of 0 new bots for me lol Unfortunately my license expires on the 16th? time to look for a new crypter

Please i need assistance in using my codex..... I have contacting on skype and no respond till date This is the secound month and it no good. please can some one assist me please.

Skype id: kad.daniels

codex crypter....I need an assistance on how to crypt with it please

WinWinPartner - September 14, 2017, 8:38 am

Cryptor does not work!!!!!!!!

lord21doom - September 14, 2017, 8:48 am

Looking at some of these posts looks like i am not the only peasant having trouble.

What a let down..... time to go buy Cyber-Seal and get 3 months.

The Skype support for codex hasn't been on for more than a month....

If anyone call help me before i buy Cyber-Seal that would be gladly appreciated i will gladly tip you

the money i could of spent on cyber seal.

Universe_X - September 14, 2017, 1:41 pm

ey bro, plz, for the love of mother Russia, do not buy Cryber Seal. Avoid it at all costs

lord21doom - September 14, 2017, 3:08 pm

Bless you bro

I haven't made the purchase yet probs take ur advice and not buy it..... i am still researching i was going to go with Smoke Crypter.

Seems to be what i need and the support is online right now.

Thank you bruh

(Sep 13, 2017 06:53 PM)mistoflegend Wrote: [\[CITE\]](#) Sir, you're the coder of the exterbyte crypter right? Is there any way for the customers of the exterbyte who purchased the lifetime package to still be able to get hold of this? I haven't used much the exterbyte and have really like it, unfortunately it was gone when I was about to use it back again. So far the best crypter I owned. FUD all the time, I still have the proof of purchase ready if needed.

PM me with your Order ID and account details.

(Sep 14, 2017 04:04 AM)Universe_X Wrote: [\[CITE\]](#) KiNG it's actually true. Crypter has been giving out error when attempting to execute the crypted file. I jus realized that this has been happening the past several updates of yours, hence the reason of 0 new bots for me lol Unfortunately my license expires on the 16th? time to look for a new crypter

Stop trying to execute on a RDP's it wont work, I've mentioned this like thousand times already. Also PM me your crypter username.

(Sep 14, 2017 07:09 AM)lord21doom Wrote: [\[CITE\]](#) Just bought this yesterday

Already having issues..... It doesn't excuse my cpu miner can someone help me

You won't get any help, Support is provided only for those softwares which are mentioned on thread, If you try to crypt miners or anything else, You won't get any help as we do not offer any guarantee for any software which isn't mentioned here on thread.

Can't see clear detection of Norton, For Eset it is the fastest AV to detect any crypted file. Refud was needed for ESET otherwise it would have shown clean aswell. Thanks for leaving your feedback. ?

Pharmacist - October 1, 2017, 5:27 pm

(Oct 1, 2017 05:12 PM)KING Wrote: [\[CITE\]](#) Can't see clear detection of Norton, For Eset it is the fastest AV to detect any crypted file. Refud was needed for ESET otherwise it would have shown clean aswell. Thanks for leaving your feedback. ?

You're right, it's not a clear detection, but I was assuming the detection by the icon missing with Norton, but not with others. ESET Nod32 is the fastest to detect anything, I can't fault anyone on that, lol.

Any time! Pleasure using your crypter.

D?gitalGangster - October 1, 2017, 5:44 pm

this cypter isn't fud brother i don't know where you got 0/36.i have been trying to see if it could be anybetter but its always the same. even the smallest Av see it as Trojan,please work on it

takktix1 - October 5, 2017, 2:23 pm

Any guide to using this with IM?, like do i enable startup, persistence etc on the crypter or when

making the stub on IM or both?, will buy sometime this week.

artis111 - October 5, 2017, 3:17 pm

"UAC bypass" , bypass Windows Defender SmartScreen too?

eEelad - October 12, 2017, 6:10 am

that's nice crypter i think i will buy again ;)

danz1234 - October 12, 2017, 7:15 am

Fantastic support and great crypter!

Riddick - October 12, 2017, 11:33 am

This crypter is fantastic. The last crypter I used (I won't name it) was usually 4/37 right after an update. This crypter was FUD and took about a week to go to 1/37 and then they did an update and it went right back to 0/37! My last crypter was never able to bypass Avast on run time, but I just tested Codex and it bypassed it easily.

IKR like holy wtf

saphunter - October 14, 2017, 12:21 pm

I try using this crypter with WebMonitor, but every time i get a VB error.

After i try use njRAT, the programs work and RAT too, but 2 or 3 ATV get the trojan.

Now i buy Imminent Monitor, because says in thread is compatible, but not working. I try binder with many programs, in many languages, but every time the RAT never load. The program load sometimes, but the RAT never executed!

Can help? I buy at time, 4 crypters and 3 RATS, and the best is Codex, but not executing my Imminent Monitor.

adster - October 14, 2017, 1:50 pm

Getting constantly 4 detections, with just a crypt and binder also. I guess stab update required

Kasper-Misr - October 14, 2017, 5:00 pm

Vouch this boy , Support is very good , and he answered me once he is online , his crypter is very good . detection rate 9/10

It's always FUD , and he update it every day . Vouch him :)

Download link is wrong fine, Please download latest version of Winrar or 7zip to extract.

gamerx133 - October 27, 2017, 3:20 pm

i bought it and havent recieved it

downban3R - October 28, 2017, 3:47 am

I've bought the crypter nearly 12 hours ago, I've checked my personal email, my PayPal email, and I've contacted support, and there is no reply. Hope this gets fixed soon.

EDIT.

Recieved it, many thanks!

I really need a Good Rat so that i can get this Crypter.

If you have alot of cash, then # is IMO the best RAT on the market.

if you code, paste from quasar (i took it as a base and done some really good things with it, in visual studio rn adding bitcoin miner)

if you want something easy to get up and running, get a native RAT with relocations

if you want run of the mill RAT get a .NET (Requires clients have correct framework version)

If you want a RAT with alot of features but dont mind .NET and risk of getting banned in a month for no reason get IM

The truth is there alot of good RATs (get them from the source tho or be prepared to get hackaki'ed)

I manage a small company and only use my current setup so i dont have to disable my security on company PC's. and i can always just walk upstairs to install latest frameworks, and my .NET RAT works fine for me, but it all depends on what your situation, whether that be managing a company or bitcoin mining on a server.

Hope this helps anyone who keeps asking these questions since they dont understand. Anywho im just gonna buy lifetime when mine runs out since this is perfect for me.

sahil131 - November 3, 2017, 2:14 am

i wish to have it too, codex i just added you on skype for some clarification on my file usage

hello friend i am seriously in need of a crypter for my # RAT, please is this product good for it, again your support is not accepting my skype request, and there are so many complains about not FUD and longer time for update!!!!

You're probably using incorrect settings because # works flawlessly.

Disable your # settings and only enable them in Codex and it should work fine.

He already gave the solution? Disable your RAT settings. Maybe the support team is just busy. I've only heard good things about this Crypter even though I haven't used it my self.

So the owner isn't a "ripper" (??). You just have no idea what you are doing. Try to look up what the settings do, there's a thread somewhere explaining this.

sahil131 - November 4, 2017, 3:27 am

(Nov 13, 2017 03:41 AM)narrow8 Wrote: [\[CITE\]](#) I just bought this product now.. Is there any guide for it?
Go to the first Page. On top is there link for the Support Forums. Under Documentation you got a list of Tutorials.

After taking a look at your Tutorial how to setup Orcus with your Crypter it does not work.
Detectionrate seems to be good (1/37 esset) but got 2 Main Problems:

1. Does this Crypter online Support Net3.5 ?
2. Even if only 1 Detection through Checkmate, when I try to test install on one of my clients (Avira Free Version) the Exe will be checked through Avira and gets removed.

Any Solutions for this ?

Greetings

tommisnigg - November 13, 2017, 10:20 am

I know this aint a support thread sorry for posting here as i cant pm yet..

Any prefered settings i should use with IM? Shows 10/35 atm for me and tried some other icons / building settings etc

Edit :

Got it to show 1/35 but now my .exe stops working after like 10 seconds . Tried using no settings from IM & crypter also tried using some settings wich didnt affect anything

Event Name : APPCRASH
Application Timestamp : 2a425e19
Fault Module Name : StackHash_449b

Will try with other rat's when i got more free time

Edit :

Tried quickly with DarkComet using the settings shown at the website and still it crashes after 10-20 seconds after opening and not getting connection (Works before crypted, tried with 2 computers.)

Also does the same to a silent miner i bought. Any help please? Will add on skype, just now saw it.

Sorry to hear this guys, please speak to support on Skype and they'll help you out.

myt9h - November 19, 2017, 12:07 am

what a piece shit of crap this thread

first beg them to accept your req on skype after 3 days they will accept
and when you will msg them on skype they wont respond

some one will not beg for your reply

rafadon - November 19, 2017, 3:37 am

What is going on? Codex closed my account and its just over 1 week

leakbeast - November 19, 2017, 6:18 am

Im using this crypter and Njrat 7.7. I disable all settings but server info in Njrat builder. In crypter i use only settings codex tells me in a guide. When i close server from processes it will not restart itself and after pc reboot it wont start. In skype they just tell me to check options but i did everything right and used a guide. Anyone know whats the problem?

That is the biggest lie on earth. King the seller himself gave me the link and password. Please stop playing innocence because your support has never answered me for the past 4 days. Even my friend who bought could not login, another bought 1 month but no product sent. Codex is stealing from us, don't try to play on our intelligence. This product is scamm, you took my 50\$ and closed my account after 1 week.

jasonvito273 - November 20, 2017, 12:05 pm

he is intentionally ignoring everyone because he know what he is doing...

vaxton - November 20, 2017, 12:07 pm

Hey, my codex account got closed
I still have 1 more week.

rafadon - November 21, 2017, 1:29 am

HF admin, please stop this codex from robbing us please. Have a heart even for once, codex is taking our money and closing accounts. Please help HF admin, please. Ban or stop codex from stealing from us. I lost 50\$, my 3 friends also lost \$150 to him. I think the crypter is now a dead horse without a owner.

KoHx33 - November 21, 2017, 4:38 am

I wanted to buy this crypter but it doesn't seems like there's a good communication and actually there is a possibility to get scammed.

Skype is the only chance for support and as a few Users wrote it's also bad cause they wont reply and other stuff.

Guys you should handle this.

leakbeast - November 21, 2017, 7:41 am

Was having some issues but got it work!

ZERO2SIX - November 21, 2017, 7:45 am

Hello,

Please contact our support or PM me with your account details. I will check your account issue. We do not close or ban any account if you've not violated our Terms of Service.

ZERO2SIX - November 25, 2017, 1:37 pm

He respond and helped me out.. was a bit late but everything is good now.. thanks King

qaisdev - November 25, 2017, 2:13 pm

I can't Crypt NJRAT !!! the file is crashed !

Nazgile94 - November 25, 2017, 3:42 pm

kaspersky and avast detect njrat and comet after run the crypted file.
any solution?:(

the avast /kaspersky behavioral protection detect it... pls ..any solution?=(

leakbeast - November 26, 2017, 2:10 am

Scan result 9/37 with njrat.

tommisnigg - November 26, 2017, 5:02 pm

The guy's whos complainig about "runtime error 216 at 004035b6" i think it has something to do with virtual machine's etc as i have only seen it pop up on my VM.

Crypter seems to work pretty decently, im not sure if the startup works tough only beacouse i havent really tested it.

Filebinder seems to maybe corrupt the server tough? didnt see any connections after binding files maybe its just me :O Should the binder be working ?

Thanks :)

Childlike - November 27, 2017, 1:49 am

I cannot get this rat to work at all with orcus I follow everything on the website yet I cannot get it to function I have been trying for a week now I added support on skype havent gotten a reply

uzmod - November 27, 2017, 11:28 am

this crypter is not yet updated from my side. hope it is not a problem from here. someone please confirm.

SlowMehMo - November 27, 2017, 2:06 pm

I think KinG had some stuff to do deal with, the updates usually come fast and the file is usually FUD, but he is busy at the moment, we all have lives guys, i hope he is ok. :/

rafadon - November 28, 2017, 2:41 am

I vouch for codex. My account has been restored and the crypter is working. King and support team are great.

Deal with him.

ESET is only one of the best AV to detect any type of stub quickly. As soon we get any detection report on ESET we push re-FUD update.

You can contact us via our Forum if you're facing any issues on Skype.

Fire_Star - December 8, 2017, 11:37 pm

You did not answer me.

I think there is some misunderstanding, You are not understanding what i am i trying to say.

The Viruscheckmate scan-result that you posted above for 9/12/2017. Its clean 0/37, when i crypt my file i dont get that clean result. You understand what i am trying to say.

Skyn3t3310 - December 9, 2017, 2:10 pm

Scammer , Why do not you answer me on Skype? I just paid again but my license is still expired?
it's scam

GreenGamer - December 9, 2017, 2:20 pm

Hello, I bought your product and I verify that I received the product fast and no problems. I will send you a skype verification with all the info.

carlitois - December 10, 2017, 3:54 pm

Why Windows Defender detect every file crypted????
PROBLEM FIXED!....

reizer - December 10, 2017, 7:14 pm

From where do i buy it?? Help me

ZERO2SIX - December 11, 2017, 6:11 pm

Verry good crypter.. long fud time.. vouch for this guy

kauf - December 11, 2017, 11:23 pm

@carlitois thought am the only one getting that. and its windows essential detecting mine

G0dzSoldiers - December 12, 2017, 8:30 pm

Nice Looking Crypter Good Look with Sales !! ?

kauf - December 12, 2017, 10:01 pm

this is getting weird and i am not getting supports as i thought i should. file crypted at times corrupt and at times it doesnt does anyone else experiencing this or am i the only one?

AnoNxWarE - December 12, 2017, 11:41 pm

Not getting any FUD crypt since I bought the license, 12 Detections with assembly and icon, WTF!?

Blacksam - December 13, 2017, 12:36 am

I did bought 1 moth for test; can make fud stub . But with that 1 month time never able to bypass runtime fud.

aviatsvi - December 14, 2017, 5:22 pm

Is it pass NOW Windows Defender?

SlowMehMo - December 15, 2017, 12:05 pm

It is detected, i tried with all my rats even # different settings assemblys icons etc, even skype detects it lol

but also, on a side note, i borked by quasar paste, it works fine unless i crypt it, and not just codex, i mean i can run it with just smart assembly

and it poops, right after i added a litecoin miner to it. anyone that might have a idea what im doing wrong let me know.

trusted crypter what is still detected.

its just over used, take a look at kazy, cryptex or razor (when it was still there)

you would never recieve a fud file, simply cause there are way to many users

previously update which was 2 weeks old had only 2 detections, i think that`s pretty decent for the price, i got customers coming from others crypters complaining about getting 2-4 detectons in 1-2 days but this is not the place to discuss lets not hijack this guy`s thread

KING - January 13, 2018, 7:05 am

The project is still running not down, I haven't completely shut down yet, Looking for plans to not shut down project but If I couldn't find a better solution I might have to close it.

ekwueme - January 14, 2018, 10:57 pm

1 Or 2 detections wit codex is far more better than the fud of many crypters,
i suggest u still give us a refud even if it has 1 or 2 detections,until you find a better solution.please
do not shut down this project

Fire_Star - January 15, 2018, 10:51 am

whats the problem? why r u thinking to shutdown this project?

I pm you whether you are still running and taking sales... you replied YES! This is not fair! You shouldnt have sold me license 2 days ago if you are uncertain the project will continue or not! Even now, so many AV detection... over 11/39 <http://viruscheckmate.com/id/i1ZAKIjkFwDT>

msalman - January 20, 2018, 2:16 pm

does it working with quasar Golden Edition is yes tell me thanks

NERO - January 24, 2018, 5:21 am

Bro i just paid for this, Never used it and it's been discontinued? Nice lifetime -.-

cabane2 - January 25, 2018, 5:43 am

codex ike mpunu for shutting down....ndi ohi,ndi nnapu

Cifer7 - February 23, 2018, 10:16 am

just wanted to try it (bought last month) and now i see this.
Nice lifetime definition
