Thread: [Average post length](#)

Wakka - December 21, 2016, 11:06 am

Is there currently any method of finding the average post length (in characters) of every post on the forums?

If not would it be possible for staff to obtain this information?

Just out of curiosity, however I suppose omniscient could use the data for analytics of sorts. Thanks also.

Unimportant information that I don't care about.
