Thread: [Made 50x my investment on Bustabit.](#)

Elitas - December 21, 2016, 1:47 pm

Got a bunch of different scripts of different users, compiled them together to make my own sorta unique one.

Got 1k bits off someone else (blew it like a noob without using script), got another 1k and it's up to 50k using the script in less than 2 days.

1k bits = \$0.80, 50k bits = \$43ish. ? I know some people are unlucky with Bustabit, IDK why I'm so lucky, but it keeps growing! Gonna buy some nice Christmas presents soon!

Haha, I heard he has a really good script.

Great earnings mate! I'm here from 1k Bits to 5k and I was already happy haha :D

webdev77 - December 21, 2016, 1:59 pm

Congrats on the win, but you didn't make an investment. You gambled.

Coindergaps - December 21, 2016, 2:00 pm

If you plan to buy xmas present, don't gamble that much on busta, or you might bust it pretty quickly:D

Nice! That's 80 cents up to 4 bucks! It took me around about 1-2 hours per day, to get it up. Had a roll of 15 wins in a row with 500 bits per win! That's 7.5k bits easy, I've been extremely lucky today!

I invested money in a gambling script.

It can't go bust; it stops once I go below x amount, and it also begins betting less but setting a higher multiplier so that it lasts longer.

Viska - December 21, 2016, 2:38 pm

50x my "investment" you don't invest in gambling unfortunately. Cool earnings though!

Invested in a script which is working, and thanks!

OneEightSeven - December 21, 2016, 3:07 pm

Good job! but I don't know why people rely on shitty scripts.

scripts in general.

all it takes is patience and not to be greedy and u should be able to make easy money.

I was betting 1 bits while I was AFK to test out different scripts and see which works best.

Joetheman69 - December 23, 2016, 12:44 pm

Nice man. Last night i started with \$28 and i got to 167 in 2 hours but im still negative net profit :(

?ody - December 23, 2016, 12:46 pm

I would stop while you're ahead. Talking from experience. But good luck.

Thanks for advice! Already cashed out ~\$20. Leaving the rest in there, so I can't actually lose anything, I'll always be up unless I deposit xD!

Curls - December 23, 2016, 12:50 pm

Started with 30k, currently up 70k in profits. Cashed out 50k. Still got 50k balance left to use the script with.

Nice! Keep playing & don't deposit if you lose! That makes it a win-win tbh.

Thanks! The 1,000 bits were given to me by someone else. So were the scripts. <3

You should sell some of your knowledge to Black Shadow, maybe it's a secret tip that he's not yet aware of and this could help him win back some of his lost funds.

Gambling is a bad habit. Please, stay away from it and do the right decision.

I wouldn't invest any money into it, but I haven't spent 1 penny of my own cash for this.

Just got to 100k profits with my script. Cashed out 70k and bet 30k manually tried to go for 2x and lost. Still up 70k.

Depositing \$18 so I can let me script run overnight. Should have just let my script run with the 30k instead of manual betting.

Automation in gambling will always make you go broke sometime. If it didn't then they wouldn't have that feature. You got lucky and your script lasted, however if you kept it going I am sure it would of failed sooner or later.

Congrats on the profits though, hopefully you pulled out and got some nice spending cash.

I understand how it works; it fails inevitably. However, you are overlooking the tweaking when it does down which allowed for it to last much longer than it should, it also cuts it's losses and bets half it twice in a row, etc. This could drastically increase the security of this; obviously it's never 100% guaranteed, I've accepted that.
