i learned about it when it was \$9. although its high now, you still have a chance to make a great deal of profit.

the trend right now looks extremely bullish (going up and up) so you still got time if you want to make more.

The bubble will pop. Wait for it, then buy some when you think it's been as low as it can go.

freshjr13 - December 22, 2016, 2:03 am

Shame I don't have even \$1 in BTC anymore :/

2SLickZ - December 22, 2016, 2:11 am

I remember when BTC used to be \$50 and people were so scare to even invest in it...

Even me... doubted it for so long.. could've been a millionaire by now, but nope.

I invested about \$1000 in BTC when it was at \$600 per btc then sold it when it got to \$700 per btc
now I'm regretting it ?

You'd be complaining even more if a sudden turn of events dropped it back to \$500.

Exactly why I sold mate, it's a gamble but I coulda got an extra \$150 ?

Tzuyu - December 22, 2016, 2:18 am

Should've kept the \$1k I had in BTC instead of buying something for \$350. Oh well, at least I made
\$100 from doing nothing.

You're buying it too high.

Personally I think it'll drop back by start of new year and then push back up by the end of January.

That's when I'd invest.
