Thread: [Best .net Themes?](#)

Xogg - December 22, 2016, 10:33 am

What are some good .net themes?

I like FlatUI, and Ghost VII but these are both old themes, and im looking for new ones to use for upcoming projects!

GruntStyl - December 22, 2016, 10:43 am

There are so many out there... However if you're wanting a good theme that's not "Old". You can hire someone to make you a theme. I'm thinking of going that route at some point in the near future.

Best .NET Themes: Windows Presentation Foundation

Spoiler ([Click to View](#))

/maximun trolling ?

And yes...i'm starting moving to WPF, i've seen the light after a few years. God bless MVVM & Binding

Malum™ - December 23, 2016, 3:36 am

If you search around on HackForums there is some great collections of themes with screenshots of each. I'm sure you'll find a one you love. Always make sure to give credit when due!

Would definitely recommend this one.

archy-1 - December 24, 2016, 10:30 am

I agree with Marwix..One of the most beautiful for .NET
