Thread: [autolog vs agent tesla](#)

arnes2016 - December 22, 2016, 11:51 am

which one should i pick i was thinking to go for autolog lifetime or agenttesla 6month since they do not have lifetime

i see autolog has 2000 and 1000 reply or so and agent tesla is relatively new so what is better?

raidercat12 - December 22, 2016, 11:54 am

well i would honestly recommend you autolog as i have used it but agent tesla is also good since it used to have a free logger or so.

is agent tesla native?

is agent tesla native?

i dont know from the two i feel like taking autolog but i am not technically skilled so i will need a setup from owner

what is native?

Zexus99 - December 22, 2016, 2:18 pm

AutoLOG for sure.

Native keylogger (make sure to get a crypter that support native) and working perfectly.

You can use CyberSeal (The only one I know that work with AutoLog).

You have also DataProtector but I'm not sure about it.
