How much money can I make?

If you have 500 bots, running 40h/s (average speed), you will have a hashrate of 20kh/s, earning 3.27 XMR a day, which is about \$27 USD.

(Dec 22, 2016 11:19 AM)BzrK Wrote: [\[CITE\]](#) So received my vouch copy from Tee Plow and have just tested it out. I am impressed.

The miner is super simple to use, and most of the configuration is pre-done you just add in your address and you can (optionally) change the pool if you so wish.

It's really stable. I haven't had it crash on me yet, I've been testing it on my 8core and it utilizes them all properly, as well as 20+ other machines which I have yet to see fail. You can't go far wrong with this miner, it just works. My only concerns are that I would like to have seen a GPU miner, but from a stability perspective I imagine that would hinder it a bit, so that's fair enough. And secondly, the stub is a bit big, around 3mb in size usually, but this is not the biggest issue in the world.

I'll give this 8/10, thanks for the copy Tee Plow. GLWS.

What do you know about this? It will get saturable very very soon. As the amount of hashing power done by botnets, the difficulty increases and it will become less and less profitable. Stop talking out of your ass.

I want to cop this soon for my botnet but I dont have enough money, you mind to leave me a vouch copy?

Sickness.

Silent Militant - January 1, 2017, 11:46 am

Also, one last question, seen you updated your website. I guess we send your our address and you build it for us? Haha sorry, all new to this:)

Is this CPU mining sir?

I work as SysAdmin for some companies. Can I put this on like 10 servers? Will it generate a revenue?

Yes, CPU.

Damn that would be savage as fuck ???

Be aware though that this program was not intended for malicious use and therefore you will have to ask for permission ?

HarambeTheLegend - January 2, 2017, 2:08 am

Can you PM me how this works please, interested, is it based on the CPU you have as well?
Thanks :)

#NewYearResolution

Be savage af with everyone XD

I want my lambo for my birthday ^^

how much revenue will it generate? Servers are never down. 99.9% uptime.. I can install it on max 15 servers maybe.. How much can I get daily?

Nice username ?
The .exe uses the PCs CPU to Mine Monero and sends it to your adress :)

Hi there, am interested in buying this but your website says 29euro and you said on your thread price is dropped to \$15 so which is the correct amount?

The Price dropped by 15\$, but that was too cheap and its now 24.99 :)
I recommend adding the [crypting service](#) and the [spreading guide](#) though.

I was hoping to get this for the \$15, i don't need a spreading of crypting since i have a big network.

If the price drops to \$15 again, HMU, Thanks and GLWS.

25\$ is really reasonable if you have a big network, you could - depending on your net - make it back within a day!

Vouch for this XMR miner, the new update was developed by me and improved stability, and is more efficient and also has miner persistence!
GLWS ?
