HackForums isn't directed entirely towards hacking at all.

We have so many different sections because we like to welcome people despite what they like or who they are.

Just thought I'd put that here.

It's been denied so many times, but I think it's one of the most wanted denied sub-forums imo.

If you want to discuss cars, come and apply to Torque group. Just make sure that recruitment is open,

Egregious Jr. - December 24, 2016, 8:15 pm

Suggested and denied in the past several times.

Vitani's Mate - December 24, 2016, 8:37 pm

We do have a usergroup that is dedicated to Cars of all sorts.

Try and post in the recruitment and try and get accepted.
