Thread: [\[Release\] Icon Creator by M3X](#)

PVPMinersDE - December 23, 2016, 2:12 pm

Hey,

I decided that I could release a small project of mine that I used for my own Crypter. Btw. it dont has a good looking GUI nor it's an advanced tool.

About:

This is just a small tool too edit Icons or create a simple icon. It is not finished and has to be improved but it's still something (?)

Current Features:

Custom Background

Custom Logos/Symbols

Preset Logos/Symbols

Custom Text

Save as PNG-JPG-ICO

Screenshots:

Download:

Source:

mega.nz/#!/GgMiFSLA!fejI89UCX0wqnAkwi6neb65NwUb-eQqsRswPyMOFjI

Without Source:

mega.nz/#!/KlcjFYxA!YHP15SuW5XyOIA-jk5QEH6jHFsRxI41eQa5K50NjC5E

Pass:

M3X

Edit:

If you try to execute the source it'll fail. Just change the output from release to debug to fix it or copy

the images.

OMG, can't you provide a link to a jpg, like mega.nz from the 1st post? ?

Here you go :) I just said that I can't embed images.

Thanks for posting the screenshots :)

Really cool idea! I love it. The UI could use some more organization and a lot of it could be condensed down (not spaced out as much). You could also create or find controls in general to increase ease of access or make it easier to understand how to use. Feel free to add me for help and suggestions!

Thanks for all the suggestions. I updated the GUI.
