What is Lorem Ipsum?

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum. ?

Not sure, it seems to be more professional but it's not what it stands for, no idea why I didn't use my own description, anyways, hope you vouch for me haha.

New prices posted! Cheapest prices!

(Google image + effect + google skype logo + text = wow)

Too many different font sizes. In some parts the title is big and in some parts the text is bigger than the titles.

<http://prntscr.com/dq78er>

What is this for design?

<http://prntscr.com/dq78hm>

Oops, you forgot to put an image there..

What the fuck? You should stick to freelancer.com

<http://prntscr.com/dq78uk>

How is this well made? It's not even nice to look at.

It might sound as sales trashing but it's not. It's just some advice.

The sales thread design really attracts customers. In this case it throws customers away.

It represents what you are capable of. If you understand the concept of designing in terms of money/business

you should know that they design can decide a lot in your favor, if it's done right.

I find it that you are lying when you're saying that these are the most HQ designs I've ever seen, that's a huge claim to make

and this surely isn't the best I've seen on the market.

I understand that photoshop/designing is made out of getting illustrations, making them look better and adding more things to it

but this is just really basic and you've made mistakes that not even a basic experienced user would do.

Such as with the pricing packages. In some you have a big title, some not.

In 1 of the packages the 2 sentences are too close.

As a potential customer, you pick up these details and you judge the designer based on what you've seen of him; in this case the thread design.

Hope you don't take me wrong but yeah.. I look like an asshole but this is the truth.

Good luck.

Good luck. This is the way I designed, I didn't ask you to waste your time here, you can quit if that's your job to ruin people business, no I design that way, some of the people might like it and some not, now you can take your comments to somewhere else thanks for wasting your time.

Thread Designs \$7-50?

No offense, but thread design you have created in OP isn't worth \$2.

You should really practice more before starting a GFX service - this way you only look greedy for money.
