Thread: [Looking for widget \[Help me please\]](#)

Vape Nation - December 23, 2016, 4:23 pm

[img]/[img]

I'm looking for a widget that looks similar to this, but more customizable and more appealing for the eye.

What needs to fit in the plugin:

Search mechanism

Any number of "tabs" (Like "namn", "varugrupp" etc on the picture)

Needs to be extensively customizable graphically.

Needs to be compatible with Wix.com!

If you know of any plug-ins / widgets that fit my description, please tell me. If you even know a good website with a big list of good plugins that would also be appreciated

Wix probably allows you to install jQuery plugins, no? This will probably help you:

<https://sindu12jun.github.io/table-dragger/>

Yeah, something like that. Still lacks the search option and It doesn't really look too appealing IMO.

Thanks for taking time!!

Thanks for taking time!!!If you're looking for search, this might suit your needs then: <http://listjs.com/>

You will need to convert your existing table to match that plugin's JavaScript format, though. If you want to implement the code yourself (if you have the ability to add custom HTML, CSS, and JS), look here: http://www.w3schools.com/howto/howto_js_filter_table.asp
