Thread: [Rata Protector Crypter - REAL REVIEW!](#)

DiarrheaProliv - December 23, 2016, 6:48 pm

[align=center]Here is a REAL REVIEW about RataProtector crypter...

This crypter not working at all, also Rata protector is NOT FUD!!!
ESET NOD 32 catch it as Trojan.MSIL/Kryptic HYJ - a variant of MSIL/Injector.QYD
It has been detected almost by all major av!

Be careful, the owner and his freinds post FAKE SCANS and FAKE VOUCHES in official thread!

Here is VIDEO PROOF

[Video: <https://vimeo.com/197308573>]

Codefuser - December 23, 2016, 7:09 pm

1. You are enabling all of those disablers and you expect it to be runtime FUD?
2. Those are gen detections.
3. Do you even have any idea what you are doing?

SIM-2053312 - December 23, 2016, 7:14 pm

Try changing icon and assembly. Also only enable what you really need in the crypter.

DiarrheaProliv - December 23, 2016, 7:24 pm

(Dec 23, 2016 08:14 PM)Chef Curry Wrote: [\[CITE\]](#) Try changing icon and assembly. Also only enable what you really need in the crypter.

Tired, but again NOT FUD. ?

(Dec 23, 2016 08:09 PM)Codefuser Wrote: [\[CITE\]](#) 1. You are enabling all of those disablers and you expect it to be runtime FUD?

2. Those are gen detections.
3. Do you even have any idea what you are doing?
 1. If Crypter is good then it will be FUD!
 2. NO! MSIL.Injector and Kryptic is NOT Generic!
 3. Yes of course

P.S. Enjoy! ?

Glyco - December 23, 2016, 9:07 pm

OP those are called false detections they're not caused by the crypter, but your current assembly and Icon. If you'd like I can help you get a FUD stub.

testpen101 - December 23, 2016, 9:09 pm

I like how you botted 9 likes and say the owner of the Crypter bots his vouches looks like both of you got something in common.

Zexus99 - December 23, 2016, 10:14 pm

I only saw ESET, that is normal from a public crypter.

All others detections are not from the crypter but from the icon / assembly, just change it and you'll get 1 / 35.

You can't have 0 detection with a public crypter, you just can't.

Twistd - December 23, 2016, 10:21 pm

OP you're like a fucking disease to this forum. Please just fuck off and leave with your 5 multis.

(Dec 23, 2016 10:07 PM)Glyco Wrote: [\[CITE\]](#) OP those are called false detections they're not caused by the crypter, but your current assembly and Icon. If you'd like I can help you get a FUD stub.

Dead wrong! Of course it's not a false positive? How can you even call it a false positive? I'm amazed. Of course they are created by the crypter, it's a generic behavior (heuristic) detection. Change the codeflow or resources a little and it will be good to go. Just stop being a jackass giving it false positive name.

Glyco - December 23, 2016, 10:48 pm

you very retarded

Shanonnn - December 24, 2016, 3:47 am

OP is just jealous bcz Rata gets more sales (° ? °) (° ? °)

"TheOldPhantom" is one big shitty form with checkboxes and buttons which do absolutely nothing.

And OP does not know what Gen detections are...

<https://i.imgur.com/WG3ZDps.png>

tibijczyk - December 24, 2016, 4:21 am

imgur / a/lZcbi this crypter doesnt work...

Vitani - December 24, 2016, 4:30 am

OP you should not make threads like this unless you know what you are talking about.

Rata Protector may or may not be good, but most of the detections that you got mad about are avoidable with a simple change of icon.

n0\$3ratu\$ - December 24, 2016, 4:34 am

I am not taking absolutely any sides, but this detections

"Trojan.MSIL/Kryptic HYJ - a variant of MSIL/Injector.QYD" can't be bypassed with a simple icon or assembly.

Those detection are probably 99% from the obfuscator Rata is using.(or the way he is obfuscating)

DiarrheaProliv - December 24, 2016, 5:03 am

(Dec 23, 2016 10:07 PM)Glyco Wrote: [\[CITE\]](#) OP those are called false detections they're not caused by the crypter, but your current assembly and Icon. If you'd like I can help you get a FUD stub.

I changed assembly/icon but there is again detection like MSIL. Injector and Kryptic! THIS SHIT IS NOT FUD! DONT WASTE YOUR MONEY FOR THIS CRAP!

Scapula™ - December 24, 2016, 5:06 am

The size of your dakcomet is suspect in your video:

The original DarkComet size is 658 kb

And in your video because you are an asshole you use a packed DarkComet with Mpress. This why the RunPe not work correctly.

But all good coders know is a bad idea pack your executable before inject it.

On your shit Downloader you have not this problem because you use Assembly.Load for RunPE hahahaha.

Your crypter is just a downloader !

also every coder can confirm that they get a detection from eset within 3 days

eset is one of the fastest AV's.

As already the other people said here you had alot of gen detection's that you can easily fix with a icon or assembly.We offer support for a reason !

<http://vid.pr0gramm.com/2016/12/24/7ae71dc1cd82af1f.mp4>

Wtf is wrong with you ?

ESET is always detecting stub after 2/3 days. Rata is a public crypter that's why ESET detect it very fast. If you want a fully undetected stub just pay for a private crypt and not for a public one. ???

DiarrheaProliv - December 24, 2016, 7:49 am

First that is not my crypter, i am not a coder of it.

Second your Protector is crap, check video, antis not working, there is detection which u cannot remove like MSIL.Injector because you are using public RunPE and ConfuserEx public obfuscator!

You cannot remove MSIL.Injector and Kryptic detection because that is not generic detection, your code is detected i am using your crypter more then 15 days and you just cannot remove that detection! STUB is detected!

People dont waste your money for this shit.

Learn to code properly, this shitty crypter is big scam. ?

French Products - December 24, 2016, 7:55 am

1 - May be a real darkcomet output but with some shit enabled on it. Next time build a Darkcomet Output in the current case it's not a valide video.

2 - You're using "Firefox" version info. Anyone know that this version info is fucking hard detected...

3 - Icon random isn't fine it may has detections...

4 - You're using Darkcomet and claming "I won't see the runtime result. Next time use a shit less detected and do video before clam bullshit.

5 - All shit that you're doing has no senses.

For resume it :

You removed a byte/used a fake file/enabled all Dk's settings. Do again a video where you're showing that you're build the file without any setting.

Use an icon downloaded and a good version info, you searched Firefox to create detections. You showed his WinAPI calls but his RunPE is a shellcode in C this is not valide cuz all API that you showed are used for call a shellcode please stop about it, you can't understand his RunPE just with API wrote in C# DEBUG it or shut up.

I don't see what I can add except you made all things for create detection and you wasn't honest in your video. On your crypter's thread all people laugh about Old Phantom Setting euh oups Crypter I want mean. On this thread all people laugh about your video except 2-3 of your bots. Please stop you're a crypter dev you need to fixe your piece of shit and stop to trash a product that is better than yours, I can say that Aurous Protector was a better crypter than you (and he didn't used RunPE) now you may know at what I'm comparing your "crypter".

sorry to tell you sonny, you appear to be slightly retarded.

your dc stub is 300 ish kb (while it should be 600kb), So i'm guessing you are using compression which will more than likely break the stub on any crypter.

most if not all of the detection are easily avoidable through a icon and or assembly change.

(Dec 24, 2016 10:57 AM)Blezzedd Wrote: [\[CITE\]](#) sorry to tell you sonny, you appear to be slightly retarded.

your dc stub is 300 ish kb (while it should be 600kb), So i'm guessing you are using compression which will more than likely break the stub on any crypter.

most if not all of the detection are easily avoidable through a icon and or assembly change.

Thank you "try" to explain to this retarded man

French Products - December 24, 2016, 10:30 am

Ok I'll don't quote your message x4 before do anything with my crypter please learn how to write a fucking post properly. I wait your videos and your review as good as rata protector's video....

It will probably another piece of your retardness level. I know who you are, you're the Delija's dick sucker, he give you some chicken's bones.

I have more customers that your dear "god" Delija will never has.

My new version hasn't all Static Crypt's customer and stop talk me about how many customers I have cuz I have limited slot. If you're a bit curious see what I do before write your bullshit here. You're a plain retard and you know nothing about coding, you're just writting what your friend say you.

So now brainless go to purchase my product and do 64108746810747641 VTs scans before do your shitty video after I'll be able to ban you :). But before I want see your retarded video as rata's video that you made...

Don't forget that your friend is staff on a retarded arabian forum. This forum explained to retarded nigerian and brainless how to remove netseal without obfuscation, shared a darkcomet moded and some retarded skiddies malware programs.

Hey retard, does your parents know that you are a fagot?

U said u will answer to me with YES or NO only! I am waiting...?

Hey retard.. I got a math riddle for you. This riddle is going to asses the level of your mental disability.

There is less than 200 retards on this forum and you are one of them.If we arrange retards in the rows of 4 there is one retard left.?

if we arrange them in rows of 5 there is 2 retards left.??

And finally if we arrange them in rows of 6 there is 3 retards left.???

How many retard can possibly be on this forum, considering above numbers?

P.S. You and your other accounts only count as one retard?. Just making it clear here so you don't get lost in calculations.???

P.P.S. Everybody knows that there is way more than 200 retards on this forum. Above example is given for the test purposes and should be disregarded by everyone but DiarrheaProliv.

I dont use anything on the Crypter, removed icon/assembly. Just used UAC bypass. I dont know why it is 300 KB, seems like Rata updated stub.

btw Rata know still that i have a license for his crypter. U can check my video too.

French Products - December 26, 2016, 3:58 pm

and do you know that a RunPE can't load a packer as MPress properly...

You made a video that said it don't work but you compressed with MPress.

The output is old, you scanned it 501601564080419 times on vt and now you just changed the icon and say new scan.

This can't be fud cuz you're using an old stub you can't have the new with your banned license and avs has the stub and you try to refud it with new resource.

it look fine to you :

DiarrheaProliv - December 26, 2016, 4:10 pm

Your "god" Delija told you on Skype or shit to ask here about 360.

Well, 360 detect registry created by a file without certificate.

Their crypter doesn't use registry as startup method...

You can't even learn how to code, MaliciousIntent asked you a simple math question you replied by a bullshit...

You're talking about C/C++ and C# you think learn a .NET language and native low level language at the same moment lol..

If a day you start to code you'll name your variable as sqddsqqyqsqsg as a retard.

If you compile a C program it will crash cuz you'll call a pointer on an include, stupid skid.

all i see is generic detection, the AV may detected it but then its will get refud, i don't understand

whats problem, go learn before you talking something, you don't even make any runtime test.
about runtime bypass, its will have trick to bypass, not all depend on runPE when the AV now can detect the exe files have runPE or not leel

i've never used rata, but this review will bring you bad rep only.

Hey DiarrheaProliv,

If you're not bored to say shit, for my case I want to say you a trusted secret (this is a secret only for you)...

Some unfud scan destroy my eyes here and in your case you're fully fud see the scan :

1 byte? Yes this is the real size of your brain...

Sup3r=B0SS - January 3, 2017, 11:20 am

(Dec 23, 2016 08:24 PM)DiarrheaProliv Wrote: [\[CITE\]](#) Tired, but again NOT FUD. ?

1. If Crypter is good then it will be FUD!
2. NO! MSIL.Injector and Kryptic is NOT Generic!
3. Yes of course

P.S. Enjoy! ?

You are a seriously annoying person. how can you add all those disablers on a old Delphi coded RAT. you need to use start up on Delphi RAT and not on crypter so your server will run. Instead of making thrashy videos, sit down get your head out of the pit latrine and test various methods. One more thing when you see a Gen beside any detection name MSIL, BARY, KAZY and Kryptic it is still a generic detection.

"You will DIE early if you quote me ?"

have a good day ?

STOP POSTING FAKE SCAN RATA BOT - IDIOT!

RataRetard, i have your license there is video with your shit, and soon you will get new year gift from me ?

I hope you will enjoy! ?

That not Rata protector ! Juste you create fake video and fake scan because you SUCK your friend and his shit crypter , fucked by Ratata , very sorry for you but if you are stupid and retard its not my fault Go to learn the programation and stop your stupidity !

TheMockingBird - January 3, 2017, 3:45 pm

zusy detections are caused by icon/assembly.

Kryptik and Injektor are caused by stub itself.

You shouldn't complain too much, op, because it's a public crypter.

There is always one or two detections caused by lack of update from coder.

You should get your shit, and make your own private crypter. Instead of sales trashing just because you realised 100% FUD crypters don't exist on HF.

©**Ratatouille™** - January 3, 2017, 3:59 pm
