I can see your post.

Tommy Chong- - December 24, 2016, 1:57 am

I had this a couple times before

Your post should be visible after some others posted in the thread.

I was told it was some mybb bug

Everytime I clicked on my last post it took me to the first page just like yours. Just wait it out a bit, it will turn back to normal eventually

Not sure if it has anything to do with this. I made a thread and even though people had responded. In my user CP it said that there had been zero responses and no views. Which did not match up as the thread has responses thus having views. It could be a little server slowness or something on the sites end hey we all get a bit Merry on the xmas run up. xD even servers.

I also don't see your post. May be a problem that will get fixed on its own. I personally never had encountered any problems like this. Hope this was some kind of help OP!

~ bump , hopefully omni can see this ..

TRH4CK - December 24, 2016, 11:33 am

Thread lagged.

If someone else posts, it will fix it. As far as I can see, it seems fixed already since a user posted after you.

(Dec 24, 2016 12:31 PM)xadamxk Wrote: [\[CITE\]](#) This used to happen all the time on extremely active threads.

Back in the Empire lounges, this would happen multiple times a day :/

Only thing I got to fix it was having someone post to refresh it.

well , it seems that's the only way to fixed that ..

thanks for the response guys and Merry Christmas everyone !!

Steff and I had this issue on another thread. <https://hackforums.net/showthread.php?tid=5458861> It fixed on it's own over time.

J. McCarthy - December 26, 2016, 8:09 pm

interesting

never saw this before

Wow, I didn't know of this. Hopefully there will be a fix? Maybe not?

Prince™ - *December 29, 2016, 6:35 am*

A thread with too many replies usually gets this bug. I don't quite know the solution to this though. I believe it gets fixed on it's own over time when other members post.

Elitas - *December 29, 2016, 6:47 am*

Yeah, you're not alone, this has also been happening to me as well as a few other HF users who have posted regarding the same issue. Just wait it out and it'll go back to normal.
