Hey guys. Now I'll tell you about a fun gambling game with bitcoin. It's a provably fair site where you can get faucet every 1 hour without doing catchpa.

You bet an amount on either green red or black. Red and black are 2x profit but green is like 8 but its more rare. There is a chat and its nice lookin. It is called bitdouble sorry cant post links atm please just look it up on google or your desired search engine.

I find it crazy how many people are willing to gamble their BTC but not their physical cash. Hope you gamble responsibly and have responsible fun. Don't blow your winnings! ;)

It doesn't feel like money to some people when it isn't physically in your hand.
