Thread: [Ghost in the Shell 2nd Gig Question](#)

SkullCandy - December 25, 2016, 7:30 pm

Okay so I just watched the first season of Stand Alone Complex and it was so awesome - but I can't seem to get my hands on the second season. It is all really expensive on eBay in Australia and getting it from america would be good if the postage wasn't total shit storm - also it's almost impossible to get it on bluray.

So my question is; how is the compilation movie individual eleven? Because I can get that quite cheaply? I mean it is 2:40 so thats about 8 episodes worth of time so I just wanted to know if it is any good and is it a good substitute for watching the second season?

c0rt3xx - January 30, 2017, 1:09 pm

its enough good i think and its worthless!

It is good but Id watch the whole thing if possible. It covers the main story which is very impressive. (I like it better than the first)

Cant find anywhere to download or stream the series?

Yesterday I found a series collection for really cheap; especially for my country. I couldn't get it for less than like \$50 AUD (\$38 USD) and that was the cheap used ones, just because it's so rare over here and usually has to be imported. But I managed to find one for \$20 AUD including postage all of a sudden, been looking at eBay every few weeks for it and randomly found it there for way cheaper than the rest from a reputable seller. So yeah thats \$15 USD including postage and it's still in the shrink wrap.
