Nice man gl, played poker on almost every site myself won few hundred and bought a laptop out of my winnings. Tip if betcoin.ag allows hud use one. Hud's are helpful tools to see who is loose, tight, passive and aggro

Also learn about bankroll management, because variance can fuck your whole bankroll up.

A hud is a heads up display. Mainly used for multitablers who need external help with basic

knowledge of how the player plays. It tells you how many hands he put money in, aggression, preflop raises, 3 bets, fold to 3bets, and etc. List goes on to suit your needs. All poker sites usually allow huds like the main poker site with real money pokerstars.

It does not seem to work for Betag. Will check to see if there are others.

It is a card game, you get 2 cards, 5 cards get shown and you need to make the best hand, Simplest way to explain it.

haha Played many hands, I would play for at least 6 hours or so. The Blinds would be 2/4 in which I play in many players are fishes.

How about your bankroll? if you are playing at 2/4, you should atleast have 4k to make sure for downswings.

I wouldn't say soft, but I know what hands to play some people go all in with 4-5.. My bankroll is about ~8k going to up the blinds soon.

Ik how you feel, I bubbled a 15 mbtc tourney (last buyin) had KJ hit top pair against a loose player. He calls my 10 bb shove with nothing and gets a runner runner to complete a straight. J 8 2 rainbow. turn was a 9, river was a Q. He had K10 off. worst way to loose my last bit of btc after betting stupid amounts on 3-5 game parlays which I regret lol
