I only use evade scripts and script for every champ i bot. Which champ is best for botting?

Just dont script, buy some rp level ur accounts in a couple of days to 30 with boosters.

Either use EXP boosts or just buy a fresh lvl 30 or a used level 30 from a trusted seller.

Wouldn't risk it. They changed the xp requirement some time ago so you'll get level 30 in no time (friend did it in 2 days).

Your proxy's will end up getting banned.

Why don't you just buy 30 lvl account instead?
