Thread: [Extremely high CPU usage](#)

Chance The Rapper™ - December 27, 2016, 12:16 pm

I just bought Witcher 3 and whenever I play, it's CPU usage is at around 90-100% and the game is unplayable.

Help

Intel Core i5-4690 3.5GHz Quad-Core Processor
Gigabyte GA-H97-D3H ATX LGA1150 Motherboard
Team Elite 8GB (2 x 4GB) DDR3-1333 Memory
Western Digital Caviar Blue 1TB 3.5" 7200RPM Internal Hard Drive
Samsung 840 EVO 250GB 2.5" Solid State Drive
Nvidia GeForce GTX 970 4GB Video Card
Microsoft Windows 7 Home Premium SP1 OEM 64-bit
Acer G246HLAbd 24.0" 1920x1080 60Hz Monitor

HelpAnyone who knows enough to help you is going to want to know your pc build.

Chance The Rapper™ - December 27, 2016, 12:28 pm

I added it, I'm just confused cause I have a decent build.

Your CPU usage is normal whilst not playing or is already pretty high, is the CPU usage caused by the game only?

It's caused by the game only. It's normally not this high when playing other games

You should probably check your temperatures, sounds like that is probably the issue
