Thread: [Think Into Royalty \[Official Group\] #3](#)

Papa Cuda - December 27, 2016, 1:36 pm

Now Royalty Free*

Good evening HackForums.

It's been a while but here is the third installment of Think Into Royalty. I suggest reading the rules first because breaking any of them will result in disqualification. Rules:

Do not PM me or Cibor or anyone in Royalty. There will be no hints given or points in the right direction other than what is given.

Once you find the answer, post a in depth explanation of how you aquired the answer. This will eliminate us having to question you about it.

When you find the answer, DO NOT PM ME. I will be watching the thread so it will not be necessary.

So let's get right into it, and good luck to everyone.

If you require any assistance please call 550-5494

Once again, good luck to everyone ?

grail - December 27, 2016, 1:37 pm

Prob won't be smart enough to figure this because dumb

Frankey - December 27, 2016, 1:41 pm

I know that it is Aristoteles, but I have no clue about anything else. goodluck to everyone!

Cibor - December 27, 2016, 1:42 pm

Solve this quick, let's prove that my and Fiber's challenge was harder

vRWN - December 27, 2016, 1:44 pm

I have no fucking clue tbh loooool

22 Savage - December 27, 2016, 1:48 pm

Is this the puzzle answer? Now Royalty Free*

Really Cool - December 27, 2016, 1:49 pm

can someone explain the objective?

22 Savage - December 27, 2016, 1:56 pm

(Dec 27, 2016 02:49 PM)faux. Wrote: [\[CITE\]](#) can someone explain the objective?

Yeah, honestly I've got no clue what we're looking for.

vRWN - December 27, 2016, 1:56 pm

(Dec 27, 2016 02:56 PM)22 Savage Wrote: [\[CITE\]](#) Yeah, honestly I've got no clue what we're looking for.

Looool ikr, have no fucking clue

Cibor - December 27, 2016, 1:56 pm

(Dec 27, 2016 02:56 PM)22 Savage Wrote: [\[CITE\]](#) Yeah, honestly I've got no clue what we're looking for.

You're looking for the answer, listen to yo hart ?

Trappy - December 27, 2016, 1:58 pm

I'd assume there's a message hidden in the image, download the image then examine the code?

Monk. - December 27, 2016, 1:58 pm

I bet all you have to do is to call the number and ask to get in Imfao.

I wish i could call but i cant.

grail - December 27, 2016, 1:58 pm

Oh I know it

Black shadow

Trappy - December 27, 2016, 1:59 pm

Called the number, Verizon told me to call back with an area code.

Cibor - December 27, 2016, 2:00 pm

(Dec 27, 2016 02:59 PM)Londonez Wrote: [\[CITE\]](#) Called the number, Verizon told me to call back with an area code.

Imfao

one of the main reasons to do such threads

vRWN - December 27, 2016, 2:01 pm

Imao what if you call the number and it costs like 10\$ a minute hahahaha

Cibor - December 27, 2016, 2:01 pm

(Dec 27, 2016 03:01 PM)Rowa Wrote: [\[CITE\]](#) Imao what if you call the number and it costs like 10\$ a minute hahahaha

Noted for next one. Thanks

vRWN - December 27, 2016, 2:03 pm

(Dec 27, 2016 03:01 PM)Cibor Wrote: [\[CITE\]](#) Noted for next one. Thanks

Imaoooo, no problem bro

Really Cool - December 27, 2016, 2:05 pm

i made an advance...

25charr

SIM-2501407 - December 27, 2016, 2:08 pm

FINAL ANSWER WILL BE HERE:

So far I (and others) have solved:

- Got the package
- Figured out the "phone number".

(Dec 27, 2016 03:20 PM)MeshCollider Wrote: [\[CITE\]](#) Does this mean anything or am I on the wrong track:

- Image leads to these lines, but I am not sure what it means yet.

- Also, I need to find out: Royalty Free and 'True'

(Dec 27, 2016 02:56 PM)Cibor Wrote: [\[CITE\]](#) You're looking for the answer, listen to yo hart ?
Missing: TURE

(Dec 27, 2016 06:21 PM)Raid7 Wrote: [\[CITE\]](#) It is! the missing letters put together the statement "True"

SIM-2015410 - December 27, 2016, 2:20 pm

Does this mean anything or am I on the wrong track:

Knowing these challenges, the numbers will be applied to form something else or combine with something else.

wit - December 27, 2016, 2:49 pm

(Dec 27, 2016 03:47 PM)W?lr?? Wrote: [\[CITE\]](#) Knowing these challenges, the numbers will be applied to form something else or combine with something else.

have we tried using the numbers for any basic arithmetic?

SIM-2015410 - December 27, 2016, 2:51 pm

(Dec 27, 2016 03:49 PM)CryptoZeus Wrote: [\[CITE\]](#) have we tried using the numbers for any basic arithmetic?

Like what? Subtract them and end up with a new number? How would that help

SIM-2501407 - December 27, 2016, 2:51 pm

I figured out what the number is :)

W?lr?? - December 27, 2016, 2:52 pm

The phone number DEFINITELY has to be either:

- a) red herring
- b) part of the puzzle

It does not make sense in the post otherwise.

SanGokuSSGod - December 27, 2016, 2:52 pm

Money originated with royalty and slavery, it has nothing to do with democracy or the struggle of the impoverished enslaved majority.

-Aristotle

The perversions are as follows: of royalty, tyranny; of aristocracy, oligarchy; of constitutional government, democracy.

-Aristotle

These, then, are the four kinds of royalty. First the monarchy of the heroic ages; this was exercised over voluntary subjects, but limited to certain functions; the king was a general and a judge, and had the control of religion. The second is that of the barbarians, which is a hereditary despotic government in accordance with law. A third is the power of the so-called Aesynmete or Dictator; this is an elective tyranny. The fourth is the Lacedaemonian, which is in fact a generalship, hereditary and perpetual.

-Aristotle

Tought maybe you mean some quotes about royalty since the guy in the picture is Aristotle.

SIM-2015410 - December 27, 2016, 2:53 pm

LMAO I just figured out what the number is too but I was already past that step ?

I might as well. It's hard to choose which group honestly.

Caffrey - December 27, 2016, 4:19 pm

Maybe the phone number isn't a phone number? Well people are saying they have solved it, how do you know? Can someone say what they found with the number because if not, it could be a serial number to something we need or a special number we need to solve this such as a code that goes to a date or something else similar.

If you were to put all those lines together, as they don't fit perfectly together there would be some spots left open, could that be morse code or something? I know that is a bit much but I am just saying ideas.

Does anyone know what the actual picture is of yet?

I never saw anyone say how the picture with the lines was even gotten. How did we get that image, was it from the original image?

Seems like,
"You're looking for the answer, lisen to yo hart Cool" from Cibor is a clue? Heart is spelled wrong, as well as listen.

Isn't there those numbers which are free to call? Maybe the "Royalty Free*" could have been to help us get the number?

Most of us are keeping it to ourselves to not allow people to get to the exact point we are on, so we are leaving a trail of hints to show others that we are at the same point.

I won't say what it is, but we know for sure we solved it because of what it leads to. I will say that it leads on to the pink lines we are discussing.

hart could be a clue, or it might just be Cibor being Cibor. We still haven't worked out what the Royalty Free* refers to but it has no apparent connection to what we did with the phone number

(Dec 27, 2016 05:22 PM)W?lr?? Wrote: [\[CITE\]](#) Most of us are keeping it to ourselves to not allow people to get to the exact point we are on, so we are leaving a trail of hints to show others that we are at the same point.

I'm not at that point yet, but maybe the lines are a mask to use over another image. Or contain some HEX.

I think the first image was used for the sandspace link, which contain a .rar

The Phone number leads to the second image (?right? not at that step) which for sure have something hidden.

Other images in first thread: I tried but doesn't work with steghide.

And thanks for the rar Mesh!

Congratulations Walrus, I'll be pming you shortly.

Good job to everyone who tried. Sorry for the slight hiccup there for a while.

The next Think Into Royalty will be released within the next month.

SIM-2501407 - December 28, 2016, 9:36 am

...Kind of lame. I stopped until about 10 minutes ago because of that hiccup. RIP hours upon hours.

It was fun tho.

I need to get adobe photoshop downloaded, I struggled only with the image...

<http://www196.lunapic.com/editor/working/14828805889932?2724198396>

:|

If I had 30 more mins I would have had it.

Will applications be reopened or will the "Think Into Royalty" be the only way to be invited and accepted to the group?

W?lr?? - December 28, 2016, 10:03 am

I'm going to make it as simple as possible, so that anyone who may or may not know about a few things can understand, too.

1. The first step I did was get the URL of the image on the thread. The name of the file contained a URL: https://s30.postimg.org/wu4gwfa4h/httpswww_sendspace_comfile7h43pz.jpg

The url is: <https://www.sendspace.com/file/7h43pz.jpg> which contained a .rar which I downloaded. I opened it up and it was locked by a password. Knowing these puzzles, I knew that the final step would have the password to this and inside the .rar contained the answer.

2. Once I knew this, I started looking for other clues inside the thread. The first clue was "Now Royalty Free*", but this seemed to be a red-herring since I could find nothing to do with it. The second thing was a phone number at the bottom:

"If you require any assistance please call 550-5494"

I was thinking for a while on this, but when I looked at the numbers in the url of the thread I saw "550" and I immediately knew that this phone number was actually a thread ID. I know that a few other people found the same thing by going through cudacore's previous threads.

<https://hackforums.net/showthread.php?tid=5505494>

3. I went to the thread and there was another image. This was not a coincidence as Cudacore has often put hidden messages in his previous posts (which are part of completing it).

So a lot of people at this point had already downloaded it and seen an image similar to this when adjusting the saturation and other parameters to get the secret message:

Many people were stuck on this image for a long time and we tried to do everything with it with no success. Cudacore then fixed the hiccup with a new image that looked like this:

Each one of these "random numbers/letters" are actually encoded with base64, the problem was it was very difficult to read. But gabr and I were helping each other out with decoding a few of them. This is what it looked like when applying a black/white color:

As you can see it was very difficult to read, but I decoded a few of them using this tool:

<https://www.base64encode.org/>

It took some trial and error but eventually I solved most of them:

For some of them, I found most of the answer (such as "Chicgo" because I misstyped something and I knew it was Chicago") and then guessed to find the full thing.

I was almost done when I decided that there is no way these can be combined for something. Each are big cities in the U.S, so one of these must be the password to the rar.

I put each inside, and "Sacramento" worked and opened a text document containing "The rain in Spain falls simply on the plain", which was the answer.

SIM-2015410 - December 28, 2016, 10:33 am

Oh RIP I wake up and its already solved. That sucks that the challenge was broken and impossible for a second time in a row. Definitely would have got this yesterday if it wasn't, because the final step wasn't that hard. GG Walrus, nice work ?

Prince™ - December 28, 2016, 10:35 am

I'm so tilted after seeing how people had to solve this. ?

Caffrey - December 28, 2016, 10:39 am

(Dec 28, 2016 11:03 AM)W?lr?? Wrote: [\[CITE\]](#) I'm going to make it as simple as possible, so that anyone who may or may not know about a few things can understand, too.

1. The first step I did was get the URL of the image on the thread. The name of the file contained a URL: https://s30.postimg.org/wu4gwfa4h/httpswww_sendspace_comfile7h43pz.jpg

The url is: <https://www.sendspace.com/file/7h43pz.jpg> which contained a .rar which I downloaded. I opened it up and it was locked by a password. Knowing these puzzles, I knew that the final step would have the password to this and inside the .rar contained the answer.

2. Once I knew this, I started looking for other clues inside the thread. The first clue was "Now Royalty Free*", but this seemed to be a red-herring since I could find nothing to do with it. The second thing was a phone number at the bottom:

"If you require any assistance please call 550-5494"

I was thinking for a while on this, but when I looked at the numbers in the url of the thread I saw "550" and I immediately knew that this phone number was actually a thread ID. I know that a few other people found the same thing by going through cudacore's previous threads.

<https://hackforums.net/showthread.php?tid=5505494>

3. I went to the thread and there was another image. This was not a coincidence as Cudacore has often put hidden messages in his previous posts (which are part of completing it).

So a lot of people at this point had already downloaded it and seen an image similar to this when adjusting the saturation and other parameters to get the secret message:

Many people were stuck on this image for a long time and we tried to do everything with it with no success. Cudacore then fixed the hiccup with a new image that looked like this:

Each one of these "random numbers/letters" are actually encoded with base64, the problem was it was very difficult to read. But gabr and I were helping each other out with decoding a few of them. This is what it looked like when applying a black/white color:

As you can see it was very difficult to read, but I decoded a few of them using this tool:

<https://www.base64encode.org/>

It took some trial and error but eventually I solved most of them:

Congrats man, very interesting and smart :P

well done bro, i got to a dead end myself when i got to the image, seriously impressed tho, and really interesting.

well done and well made by Royalty

Definitely would have got this yesterday if it wasn't, because the final step wasn't that hard. GG Walrus, nice work ? Yes indeed. It was unfortunately the case. I even checked to make sure it was doable. Apparently I'm going to have to take extra precautions for the next one.

Hopefully I will be able to get the next one, would be nice to join your group. I think I have some interesting ideas on what sort of stuff could be in these challenges.

If you checked then how did the image quality change in that time?

I'm not gonna lie, unfortunately that's the only thing I didn't check. I should have been more specific with that last comment.

Malicious Intent - December 29, 2016, 1:46 am

Staff night out got in my way lol Congratz to the winner. Also the thread id didn't work for me and that was literally the second idea i had for the number. Don't know why by it kept saying page didn't exist. Regardless.. it was nice challenge .. Thanks

My work computer is still bruteforcing the password as i write it haha i guess it can stop now.
