Thread: [Exterbyte Crypter one of the best crypter ever on HF. \[Review\]](#)

nobider - December 27, 2016, 7:02 pm

I recently purchased crypter called Exterbyte. Thread link:

<https://hackforums.net/showthread.php?tid=5500310>

I have tried many different crypters but this is one of the best. Very friendly support and cheap. Also 0/35 FUD. This is one of the best crypter I ever used in my life. If you are looking for cheap, stable and friendly support I will suggest you to buy Exterbyte Crypter. Here is my recent test scan:

<https://pscan.xyz/results.php?id=IONApnpZtqJogVoK>

Runtime results are amazing too. Worth every penny. I will give this crypter 9/10.

Wow, best crypter all your life eh?

You'r life aint very long though so i doubt you've tested that many crypters. (17 hours online on hf in total and registered like 2 weeks ago ?)

From the looks of it.. this is your first crypter ever AND you bought it TODAY (30 min before you made this thread). So please just stop it with these useless threads without any solid context.

Runtime? Pffft, you didnt test shit in 30 min ?

@nobider : He(Twistd) seems to be some kid and he is pissed of because ExterByte crypter is doing good lol.

Go get life bro and stop posting silly things. We all know how to test the crypter but we are not here talking about testing crypter. Thread is about the review of a user who find its best and better than others, then why do you pissed bro LOL

Jesus just reading what you write makes me get cancer in my eyes. When did you take English class exactly? Back to subject, why on earth would I care if this crypter goes good or not? You realize that I don't sell shit and that I speak my mind when I see stupid stuff like this? Get a grip kid.

TheDeadOnes - December 29, 2016, 5:47 am

This boy right here Twistd is a real nigga he can make shit that'll make your head spin.
he is a god in his own damn right.

Just gonna butt in here...

I was looking for a cheap crypter, and found ExterByte. I got it for only \$11.99. I crypted my stub with the settings I desired, and tested it on multiple no-distribute virus scanning websites. 0/35 on all of them, needless to say I was impressed. I've never spent money on a crypter, and have got files down to 2/35 using various methods, but am very surprised at 0/35 for such a low-priced crypter! At first to be honest I though it corrupted my stub, only to find out it didn't, and actually worked. Would recommend this crypter to many as well.

Mitlar - December 29, 2016, 2:28 pm

Not sure why there have been at least 5 threads reviews about Exterbyte. It's quite annoying when you see the same exact thread spammed on a daily basis.

japen1 - January 7, 2017, 12:59 pm

Hi King... i already download it.. but can you please send me my KEY? my email is japendo4live@yahoo.com i cant PM U ON HF because i don't have post... please respond..

why did you say so @Zexus99 ? I'm yet to receive my key... But comments I've seen here, shows the crypter would be great and FUD..I think..... Have you used it previously?

Let me know.

Seller is forcing, giving discount or asking his customers to flood this section, there ain't no question about it. Some people don't understand that too much gets the opposite effect. Annoying as hell. But what can you expect when you got a brain-size of a peanut.

Unless you can back up your claim it does not say much. From what I see everyone has this amazing exception of rata but scapula and op on rata thread, fails to answer simply questions.

So again do you really have prove the seller (king) is giving discounts to spam this section?

2mek - January 18, 2017, 3:15 am

I can say its one of the best atm on market. And its pretty cheap too.

these threads make me sad :(

people don't understand runtime and scantime.

romantic179 - March 18, 2017, 5:52 pm

mhh i dont like Exterbyte .. i dont get good results with it, and i tested alot of crypters.

best for me so far Rata.

i have to test static in the future

cancer, the crypter scene is fucked, all builders are basicaly the same, the STUB is the important thing, and malware analysts detect it in a few hours of going pub, a good obfus should be able to go a month or so being public before becoming detecteed

exterbyte was the epitome of shit
you could use winrar instead

Kind regards
