Hello, so I'm opening this community as suggested by a few people on HF.

User : <https://hackforums.net/member.php?action=profile&uid=2277883>

This user (Knifes) ordered me to make him a "Pinterest Mass Like Bot". Because he seems to be trusted, I made it without any payment upfront. In the end, he doesn't even reply to my PM/Skype message when I want to give him the bot and receive my money. (Ps. I haven't give him the bot yet, that's why this is a community alert, not a scam report)

First PM :

Skype chats:

Me PMing him:

He read it :

He even have time to bump his thread :

My advice : Take payment upfront from him or don't deal ?

Thank you
