Thread: [Clearing up my "Same IP as other members."](#)

juulstar - December 28, 2016, 12:34 pm

Simple response: I use a shared VPN that uses a pool of users to relay off of.

More simple- I cannot afford a Paid VPN atm.

:(((pls stop drepping me ??

Maxie - December 28, 2016, 12:35 pm

Don't do this, you are just digging yourself further down the hole.

Still explains nothing. Aren't VPNs like not allowed or blocked on HF? Please correct me if I am wrong

You're just attracting more attention to yourself by making this thread, regardless I'm pretty sure VPN's are not allowed on Hackforums.

I don't believe so.... In the "Trust Scan" section, it says "Same IP on login" If you get too many of those, it goes red.

RED=BAD

<http://www.vpngate.net/en/> has a lot of vpns that aren't blocked by HF

I don't see why you need to be on a VPN on a forum, not like a member is going to hack the database just to grab your IP, unless... you're hiding something.

The only way is to either find a private vpn to use, or stop using it.

(Dec 28, 2016 01:35 PM)kaptid Wrote: [\[CITE\]](#) Still explains nothing. Aren't VPNs like not allowed or blocked on HF? Please correct me if I am wrong

No, only specific VPNs are blocked. I can't find the quote currently, but omni once said he doesn't care if people use VPNs, but if theres trouble arising from that specific VPN; then he'll block it.

The same reason 90% of the population of people who use VPNs use them for; Privacy. Why do you have blinds on your house, if you're not doing anything bad? For privacy of course. Just because you want privacy, doesn't imply that you're doing anything corrupt.

Yeah I thought this might happen. You took what I said wrong. I am trying to help the OP out of the hole he is still digging for himself.

If he left it alone then he is just another 2016, new member that no one knows of and can build his HF account based on his actions and not threads like this.

Dude, I'm getting tired of everyone saying "there's no need to use a vpn" Yeah, you're right if you were just using HF. If you're doing blackhat stuff or even cracking accounts using a proxyless config you would need a vpn. There's so many reasons why you would need a VPN, so just because you don't have use for one doesn't mean someone else doesn't need one.

Or the fucking haters can stop being retarded and understand that VPN's are used for SO many things, let me give you 2 3 examples I can think of off the top of my head.

1. PrimeDice requires a VPN to be able to deposit money.
2. Many Minecraft servers IP ban and users need a VPN.
3. Whilst ratting users may want to use a VPN to stay safe.

Fuck off~

I actually gained rep from upgraded/angry (at the people who negged me) users with the message "VPNs are allowed." You can check if you want.

I actually thought I would get negged but the HF gods gave me some rep. xD.

Otherwise, I didn't do this for rep, I am just thinking of purchasing L33t, and I wanted to have a good reputation around the community, and nobody likes a multi who upgrades.
