Thread: [Profit Rebel - New Website - Feedback Please?](#)

Juicy - December 29, 2016, 1:31 pm

Hello there! My partner and I have finally gotten our website complete and it is now ready!

<http://profitrebel.com/>

We would love to hear some feedback and evaluations on the site. Is it aesthetically pleasing, etc. Do you believe that customers would feel safe buying from this site, all that.

Huge shout out to my partner [Academy Awards](#) and everyone else who helped design the website and make it all possible.

Nice website, simple, I like it. Some things I would do is maybe on the index page, instead of putting the ebook cover and then all the text, put the ebook and then a short description. Most people's attention spans don't last over 10 seconds, as of 2000. (Now it's down to 8 seconds in the mobile evolution) >>[Source](#)

Maybe something like this:

*inspect element was used

And then when you click on it, the paragraph from before would be shown before the current lazy revenue paragraph. (I know, kinda confusing)

I hope this helped, great site.

I like the landing page, but tbh if I was a customer I would need something more visual in regards to the packages and descriptions.

I would use a different font for the text inside the descriptions...

I'm currently using Firefox and its really hard for me to read it... and it might be because I'm using a small laptop....

It might be different on someones else monitor...

Other than that I really like the background and the title top of the page. It caught my eyes really quickly.

on scale of 1 to 10

I'll give it a 9 :D

Site looks really nicely designed, no mistakes I can find.

Should be a friendly site to buy E-Books from and share testimonies of them. Nice job OP!

Looks pretty good man, just change the webicon from host gator to something else ;P

Interesting, I haven't tried, but how are the vouches processed and put onto the website without spam? Is it just a contact form sending it to your email?

NYCVN - December 29, 2016, 5:17 pm

Is it just me or is the logo choppy?

I think the site looks 100% professional.

problems.x - December 29, 2016, 8:15 pm

why is the site not up for me.

Filthy website design and filthy content. Not to be commended

CALIFORNIAN - December 31, 2016, 12:49 am

My suggestion would be to put up a favicon.

Also a YouTube embedded video in landing page to engage more with the consumer or visitors.

well the the top logo in prize rebel looks like it was background cut as the lines arent sharp around it. also wouldnt jam 4 ebooks on front page. needs a whole different layout.
