Thread: [ExterByte Crypter - Sneaky rebrand of abandoned project Diverse Crypter V4 ID=1407964](#)

Uilekejo - December 29, 2016, 7:21 pm

Hello everyone,

You be careful at purchasing all these Oberon/Orway/Diverse/Brain ... Software copies, it all started with Neanderthal (ref:

[hxxps://hackforums.net/showthread.php?tid=4335869&pid=41955196#pid41955196](#) see the quoted name) then later Prestigio selling Oberon then Orway series of software including crypters, loggers, mail spammers, ...

These softwares have been living here for a long time, after Prestigio has gotten a closed account for multi account (lol), there has been some attempts to try to sell again on the forum, [hxxps://hackforums.net/showthread.php?tid=4587707](#) BrainProtector, then after getting a lot of hate, it has stopped, later again Miki opened a new version of his protector but this time, he wouldnt code it, but instead leave the Job to Reasen (coder of all the software copies), it would stay under the radar because Miki already had a protector for a very long time, then they open DiverseLogger.

Now ExterByte is the next one as Miki has gone missing from the last few months

[hxxps://hackforums.net/member.php?action=profile&uid=1407964](#) King is selling it, on this [hxxps://hackforums.net/showthread.php?tid=5500310](#) thread.

I have made a video containing a proof that the software is indeed a rebrand of Diverse Crypter V4.

[hxxps://dl.dropboxusercontent.com/u/50176735/ShareX/2016/12/2016-12-30_01-32-18.mp4](#)

I have sent this video to King by PM, and judging by the timestamps, he must have modified the pastebin content WHILE I was making the video/investigation to avoid me getting any evidence.

Here is the PMs and timestamps, my HackForums account is set to CDT TimeZone, GMT-5

[hxxp://i.imgur.com/TBouNPZ.png](#)

[hxxp://i.imgur.com/CatLTNI.png](#)

Also here is a recorded TeamViewer session we have had later, sadly you cannot see the right side chat.

[hxxps://dl.dropboxusercontent.com/u/50176735/ShareX/2016/12/m82-337-694_2016-12-30%2002.03.tvs](#)

I also have a weird feeling that King's account may be hijacked, because the country of registration and current one doesnt match, and I'm ready to bet the current one is Spain :)

It is pretty easy to spot these scams, if you see one crypter advertising Delphi, with a line of products such as Logger, etc, it is from these guys.

Hope to have opened your eyes.

Best Regards

Codefuser - December 29, 2016, 7:22 pm

This analysis is legitimate, and I would advise thinking twice before purchasing this crypter.

Links and images for lazy peeps

Shanonnn - December 30, 2016, 2:56 am

Well...just wow...another "brand new" crypter on HF... nice find.

KING - December 30, 2016, 4:42 am

Few people aren't happy with success of Exterbyte.

Here are some interesting facts about this guy:

Now let me talk about his bull++++ which he's using to destroy image of Exterbyte Crypter. He made fake video when I visited him via Teamviewer. It was totally different result.

Why didn't you used your original account to upload these fake proof's ?

On your screenshots it shows: Jelokadi which is your another account but because you got warnings from staff so you decided to make new account to upload your fake proofs?

You're not one. I understood all game now. You're part of a gang which is on mission to sales trash. I'm aware of all your team members who are part of this mission.

Also I have Gauth/2FA enabled on my account. No one can jack my account!

And for your kind information I'm not from Spain and Our customers are happy with our product.

Check these threads:

<https://hackforums.net/showthread.php?tid=5503087&highlight=exterbyte>

You can get in touch with any one of them or any other customer.

Also guy you're talking about "Mike"

He has tons of unresolved scam reports. You can search my user ID in Dispute Database. There isn't even single scam report against me nor I'm that type of person.

I'm manager of this project and if there will be any problem. I will take all responsibility. Talk with me only when you have valid evidence and show them to me via Teamviewer otherwise don't talk.

I will not waste my more time on you. I just wanted to clear everything for HF members. From now and so on. If you continue with this I won't reply. I will just contact staff!

Malicious Intent - December 30, 2016, 4:48 am

Well it seems suspicious.

DotGlass - December 30, 2016, 5:01 am

Seems like if someone use a skin and also was used before from a member, then competitors will use that for try to sales trash you, good to know if i launch some product in a future at least.

Maxie - December 30, 2016, 5:03 am

Commenting to follow the development on this.

Not going to take any sides, though.

Codefuser - December 30, 2016, 5:08 am

You enabling 2FA NOW doesn't change shit, as far as we know it could be the account jacker enabling it to

1. Polish the trust scan.
2. Prevent the original owner from getting the account back.

Sir Dabbingston - December 30, 2016, 5:34 am

Oh dang seems legit. Just be careful out there guys!

©**Ratatouille™** - December 30, 2016, 5:42 am

Why ?

All people get by sending you evidence is giving you the chance to hide it better.

While I was seeking for it, 11 minutes after I sent you the private message to please wait, you updated the Pastebin content with a new version of the binary which doesnt contain the Diverse Crypter V4.0.1 string, you're a liar, that's all you are.

You exactly know what you're doing!
