So today I decided giving out my CSGO Bhop script for free.

This script working on 128 and 64 ticks.

For run the script, required to download and install the program [AutoHotKey from here](#).

The program isn't cheat and there is no inject into the csgo, there is not risk for VAC but I won't take responsebility for VAC or Overwatch bans, use at your own risk.

For download, post below or PM me.
