Thread: [ExterByte Crypter - Nothing more but old OrwayCrypter](#)

©Ratatouille™ - December 30, 2016, 12:55 am

Again one powned ?

Orway Software have same method protection by netseal , use "downloader" for download real crypter

Orway Software has the same protection of his Licence system with NetSeal, it use a WebClient and a DownloadString for download the real crypter. + get stub on pastebin base64 sfx

Orway Crypter , Orway logger, ExterByte Crypter = Same guys
Here the proof :

Flaws. - December 30, 2016, 5:47 am

Ayyyyy lmao

Love to see crypters getting ripped its hilarious

Well done on this one

Malicious Intent - December 30, 2016, 5:51 am

LOL another one bites the dust.

KING - December 30, 2016, 6:51 am

Exactly I knew it you're behind this game. You can get rest of your gang members to make threads. Bring up some serious solid proof's. Yesterday your other team member made a fake video when i checked him via teamviewer it was totally different. Look at the Orway features and our features. ?

If it's same product why not features are same? Why GUI isn't same? Why stub isn't same?

Instead of rising figures on others. You should focus on your Crypter sir:

<https://hackforums.net/showthread.php?tid=5502636>

Your other gang member said it's Diverse Crypter. Now you're saying OrwayCrypter. Now after few days you'll say it's RATA copy ? Lmao.

Feel free to continue with your crap. ?

As what I see in the video, it is a solid proof now.

Hey Rata, is it illegal for having a copy pasted product? I mean, maybe he has the approval of the owner?

debug - December 30, 2016, 10:51 am

Detective Ratatouille™ at it again, clearing the marketplace of shit products. =]

TOM - December 30, 2016, 11:00 am

Ok Good Job rata seems like you're a Good R Engineer , Thanks for the warning

French Products - December 30, 2016, 1:21 pm

Diverse Crypter has the same base.

People here need to know that the Orway's dev, the Diverse's dev and now the ExterByte's dev is Prestigio...

Maybe KING know nothing about a crypter and just had a contact with Prestigio and he said him that he want again have a crypter on hf's market and asked him if he was able to sell cuz he has a huge reputation.

The best thing for you KING is that you stop all deal/prestigio with Prestigio the retard (you'll have only problems with him) and that you stop to sell this "crypter" here it's a total scam

Rhez - December 30, 2016, 3:53 pm

I build that source and it gives me a sfx? I then open it and it contains 3 file.

- dump.bin
- Project2
- StubCompiler

same as the other said crypter. SO yeah.

Hello,

I have no idea who Orway was or who Diverse was or who Prestigio was. Exterbyte Crypter is my project and I take all responsibility for this project. Those clients who have bought it are happy with it. There isn't even single report regarding issues with crypter. I personally check everything just to make sure that everything is running smoothly. However I have decided to launch investigation into this matter. If my product coding team has used any code from anywhere. They'll have to pay price for it. I have also decided to change theme of crypter. Until these issues are not resolved. I'm going to keep thread closed. These all issues will be resolved within 1-2 weeks. All customers of Exterbyte they'll be able to use crypter without any problem and our support team will continue working.

Thank you,
-KinG

Thank you,
-KinGWell, your coding team is only one guy... maybe he changed his username I don't know but this is Prestigio for sure.

He took his diverse crypter project (diverse crypter's source wasn't leaked or I never saw) you can't say that this is false it has a string "diverse crypter 4" see the thread and the video that was posted you can't even lie about it. just tipe Diverse Crypter on HF you'll see that.

You may not say me that you're testing yourself because you don't know anything about malware, crypter, and shit you don't have any thread in cryptography section or RAT section...

The GUI will change nothing this is not the GUI the problem, your "co-worker" was banned there are long time ago from HF and he code tons crypters and malwares that are sold on websites or HF. Orway and diverse are just an examples. You may be careful with that ! Diverse, Orway and shit are total piece of shit and a scam. I understand that you want to do money on HF but sell only quality product.

Your "team" is Prestigio.

You refused to tell us who is the coder, asking for it results in us landing in your ignore list.

And how will you resolve it? Recode it from scratch? Changing the theme doesn't do anything at all.

x64 - December 31, 2016, 5:26 am

If it's true what everyone is saying here, you should just suspend your

"crypter" project. Prestigio is known for a lot of scams. I was there when it happend, a shame for all crypters out there. Also, look at the strange vouches in the thread. ?

Codefuser - December 31, 2016, 5:35 am

boo1234 - January 5, 2017, 10:23 am

I've purchased a few crypters from here but this one I'm really happy with support has been great, FUD so I honestly couldn't give a shit what's posted in this thread.

anonymousz - January 12, 2017, 2:55 am

sorry i'm a noob, I bought Exterbyte when it was released couple of week ago.. so is there anything wrong with orway? or diverse crypter? is there anything wrong with getting stub from pastebin? is that dangerous? cause i've been using this crypter for a while and it has some hiccups at first but i think it's working ok right now

Rhez - January 12, 2017, 6:54 am

(Jan 12, 2017 03:55 AM)anonymousz Wrote: [\[CITE\]](#) sorry i'm a noob, I bought Exterbyte when it was released couple of week ago.. so is there anything wrong with orway? or diverse crypter? is there anything wrong with getting stub from pastebin? is that dangerous? cause i've been using this crypter for a while and it has some hiccups at first but i think it's working ok right now

Not at all but buying something like that was putting you at risk as the Dev of that crypter was a scammer.

Talking about the stub, there's nothing wrong. It is just a proof that Prestigio was the coder of that ExterByte as it was all the same with his past crypter.
