Thread: [Post your gaming setup](#)

chase. - December 30, 2016, 8:22 am

I recently got a computer for christmas and it was the only thing holding me back from having a dope setup. I want to see your guys and also what should I improve on mine. I want to get led strips for behind the desks and maybe shelves to hold things on walls. I also need to get a monitor for xbox. Post yours below

Vishnu™ - December 30, 2016, 9:13 am

Not a gaming setup. I just have GT 610 Gfx card, MSI 970 Gaming mobo, amd 6300, Logitech G90 mouse, 5 \$ gaming mousepad :p no cooler, extra fans. i get 60 fps on D2 :D still better than nothing.

Just recently bought the parts for a new computer, put it all together. Works great! The best computer Ive ever owned but my monitor is messed up and the screen resolution my gpu is outputing is not the same as the monitor size. I can HDMI scale it but it makes it not as smooth. Other than that my gaming set up is pretty nice. Just added a razor blackwidow keyboard too this christmas.
