Thread: [Move the SEO and Internet Marketing Section To Money Tab](#)

J. McCarthy - December 30, 2016, 12:57 pm

My suggestion is to move the SEO & Internet Marketing section to the Money Tab from the Web tab.

The reason for this is I personally find people interested in IM aren't really looking in the Web tab, personally I didn't even know we had the forum until a month or so ago

Moving it might be for the good of it. It seem to be a lil inactive at the moment, or simply, less used. Maybe more will see it if it would be moved.

Support.

I just wanted to bump this back up for consideration

I like the area of that section, but I feel like it needs exposure, +1 for the suggestion

While I do think that it's where it should be right now, I do think that it would gain activity if it was moved to the money tab.

I'm interested to see what Omniscient thinks about this.

I think moving it to the money tab would be a great idea.

Half the ebooks here are sold on traffic methods. More exposure to free discussions would be great
