Thread: [Best social engineering forum 2016-2017 orionpid . com](#)

ayylmoa - December 31, 2016, 5:09 am

Hello Hackforums,

We are here to present you a brand new community, Our community, mainly focusing on the art of social engineering and cracking.

Be sure to check out our community at -> [orionpid . com](#)

Who are we?

A community and family, Worlds highest quality social engineering community with the highest quality individuals.

We strive to provide the utmost security and resilience for our members and their content, privacy is our number one priority.

So if you know how social engineering works to self improve then this might be the forum for you! and be sure to check it right away.

What does OrionPID stand out?

We have the most friendly staff out there whenever there is an issue site related or a fight between members our staff team is there for us.

And least but not last our staff helping out members with their SEs posting new methods and trying to keep the site as high quality and clean as possible! If I could rate our staff I would give them a 10/10. And then we are not even talking about the great coding skills of our development team.

Most recent updates?

- Holiday Mode added
- Articles have been added to share the highest quality content on.
- Excuse Generator has been added to generate high quality excuses to se new companies.
- Address spoofer in case you don't have a drop.

And a lot more these are just the highlighted ones.

Why I am posting this here?

We refer our site to this site because we want to offer that opportunity to everyone to stop buying ebooks and make real money.

And we know our staff is always working on the forums sometimes they are working day and night on pulling amazing updates to the site. And since we are a community and family we care about all the members in the community.

Because at the end it all makes us a member of the forums and we hope to see some more activity soon in the forums and that's why we want to invite you to our family.

If you did not already, check out -> [orionpid . com](#)
