Thread: [How to see if a paypal account is verified on F&F payments \(NO PM\)](#)

Egregious Jr. - December 31, 2016, 10:17 am

I found this out myself, it's pretty cool.

Paste the transaction ID after "ID=" and BOOM.

Oh i see. This is for transaction ids only.

The feature that they have, or used to have for business accounts, you could just enter their email and it would give you confirmation if they're verified or not. Cool though.

Thanks for this, will be useful.

So, I send a penny to the buyer/seller and then paste the transaction ID afterwards?
