Thread: [\[PLEASE READ\] SCAMMED OVER 90K \[PLEASE READ\] *Hundreds of Impersonators!* INFO FOUND!](#)

Academy Awards - January 1, 2017, 12:30 am

Hello, not sure if I would consider this a new find or if everyone already knows about this. But, to me, this is the biggest find for me. I was on HF and I was contacted by a user name dannykhalifa.hf on Skype. This user claims to have scammed on HF \$90K. Apparently, he has a secret operation going on HF.

This user claims to have partnered with several different members on our community. Highly trust and mediocre. Here is proof of his claims to have those who work for him:

Proof [\(Click to View\)](#)

As you can see, I am trying to figure out who these users are. I have been trying to play along to get as much info as I can.

Here are his claims of the amount he scammed:

Proof [\(Click to View\)](#)

<https://i.imgur.com/QbFiGyp.png>

He has multiple aliases scamming everywhere. As said above. He has scammed me money so he could scam you.

What you should do in situations like this is make sure the user is highly trusted and has feedback about exchanges. If you really need an exchange I recommend using an MM. I will be soon opening up a free service to prevent shit like this happening.

Here is the user trying to recruit me (as I did "show interest")

Proof [\(Click to View\)](#)

This guy has people all over the place. Trust me scamming someone is easier than you think. There are a lot of dumb asses who just want to do a deal and get the money. It doesn't work that way. It won't be easy. You may get scammed too. That is why you must always be patient. Don't do deals in a hurry.

If you have a question about a suspicious deal, PM me. I will let you know if you should deal or not. I will make sure you go to the right person.

Stopping scammers is something we all should be doing. If you get scammed why wait? Report it. On HF, to the police, to PP (if that is the case). No worries, if you do get scammed shoot me a PM I may be able to help.

I was scammed by two users today. Both I am quite sure are minors. Here are the accounts (Skype

and HF) that I recommend not to even consider dealing.

dannykhalifa.hf ([Click to View](#))

alphaxplorer ([Click to View](#))

Teresa ([Click to View](#))

hekaros.hf ([Click to View](#))

Here's how to spot a scammer instantly on Skype before doing a deal.
[Spoiler=Example]

It's actually not that hard. Also, whenever dealing check that users negative rep. If you see one that has to do with deals question that user. Scammers sometimes are hard to validate since they can also be highly trusted.

MM is the best way to go any day. The main idea is don't trust anyone.

I assure that anyone who trashes this thread is probably a scammer no doubt. I will be updating the list as I go along. There are always more scammers.

All the scammers above have been dealt with legally. I have called the police and given all their personal information. So, whoever they are, they are fucked.

Unfortunately, I didn't want this to be true but it is. It even happens on the holidays. So, stay safe out there. Please!

Here is a thread showing ONLY 10% of the imitators Skypes' he owns. He runs them with over 20 different users on HF.

<https://hackforums.net/showthread.php?tid=5510563>

So, I probably made a mistake talking to this guy. Do not deal with me unless confirming via PM. He is planning to scam others using my alias!

Claims ([Click to View](#))

DO NOT DEAL WITH ME ON SKYPE WITHOUT CONFIRMING VIA PM!

Plans ([Click to View](#))

Here is his threat.

Threat [\(Click to View\)](#)

I tried to make a deal with him and paid him \$.20 BTC. He did not accept the attempt. So, now he is out to scam.

I THINK I MAY HAVE FOUND 2 OF HIS PARTNERS:

Proof [\(Click to View\)](#)

So, I tried an old trick in the book to try to find out his HF username. I sent him an old thread. Turns out he didn't look at the thread, but two others did. I'm not sure if he tricked them but just in case, I will be adding them below:

Epik-: <https://hackforums.net/member.php?action=profile&uid=2522837>

Asvps: <https://hackforums.net/member.php?action=profile&uid=2985509>

Those two above are the ones that read the outdated thread. If you check the screenshot you can see he has contact with them over Skype as well. These COULD BE HIS PARTNERS. COULD.

Here is a conversation with another alias account:

Telling me who's the boss [\(Click to View\)](#)

That there tells me who the boss is. It's not the imposter Danny it's someone else. Here is more info:

Conversation [\(Click to View\)](#)

So, even though I know this info I doubt I will get any where with it. I will try to keep all of you updated with more info.

The two who I said could be his companions if they are not, they must prove to us they aren't otherwise I will make sure they won't be doing deals with anyone.

Unfortunately I can tell you that's not the Danny I have on skype. And the one I have is the legit Danny.

His skype doesn't even have Danny in it. So I would suggest putting a disclaimer on this thread. Since I know for a fact that the skypes you listed aren't his.

Lol last time I was scammed was last year out \$500 BTC by a close friend.

I've never been scammed by a random user on hackforum because I'm very careful when dealing with non reversible payments, of course not all scams are avoidable, you will have a few good apples turn bad, but It's sad to see people trying to steal as much money as they can from other users. Earn your money don't steal it.

Here's a hint: he hasn't scammed over \$90000. Of course he's going to sweet talk you to make selling out on HF sound like a lucrative opportunity. In reality, he's likely a sad individual who spends his days faking an identity for small cash. He could go out and get a job to make more than he is currently making.

SMFollowers - January 2, 2017, 12:55 pm

If this is real. There is absolutely no way he's made \$90k in two years. He's asking you for your share if you were to join his 'team'.

This guy is a joke. I wouldn't bother with it, good thread though.

Omniscient - January 2, 2017, 1:00 pm

Someone trying to SE you into giving them BTC. Simple fact....TRUST NO ONE and then you'll be fine. Consider that everyone here is out to get you. Some for money and some for the lulz.

Quote:Where is the proof this member supposedly scammed 90k from HF?

I suspect that to be a real statistic but over a period of 5-7 years. We have a serial scammer that has year after year targeted the community. You think we have a lot of scammers here but most scams are small-time under \$50 but one guy I'm aware of does it like a pro and has been earning thousands a year from it. He brags all the time.

It's not hard to understand that we have these types of people in the world. Consider criminals who have killed dozens of people with almost no reason. This serial scammer has deep mental issues and won't be stopped by decency or guilt. He will need to be caught, arrested, and put into a cell forever. Or maybe never caught, who can know these things? But we should not be surprising that someone does this.

Quote:Omni has admitted it himself. While we don't know which accounts the user is currently on - there is someone from Greece who is buying and scamming on accounts

That's not the same guy. Greece guy has more obvious pattern. The guy I'm talking about works long-term. Most likely he has a major account now that he's building up to do a \$xx,xxx exit scam. Usually does that about once a year. I think he finds it more enjoyable than making \$50-\$100 a few times a week. Plus my guess is that he's a psychopath that enjoys building up trust then destroying it. He will lie to you at every turn.

Just too many mentals online that are attracted to our community. It's a small minority but they are here.

Quote:Like, I feel like the only people that sell their accounts really just hate HF.

Nah, usually people that just get bored and leave. The haters often have to express it then they get closed or bad reps.

I strongly discourage anyone from using Skype with someone who in-reality is a stranger to them. Even if you think you know them on HF, you truly don't. My motto is simple, I don't know you until I've shaken your hand.

@Academy Awards, don't believe everything he tells you, actually doubt everything he says because it's almost surely a lie in it. You sound like an easy victim based on your interactions with him. He's making you look like a childish idiot. You know he's a scammer yet you're interacting with him in Skype. That's foolish and stupid. Do you think he's going to be your friend? The outcome of interacting with scammers is threats, lies, and scams. GROW UP.

Quote:Yeah, I know. I didn't think so either. This is something much bigger. I have to be more careful now because he has made claims that he will send his team out to scam me.

Scamming is not against any rule on HF. That is why he is not getting banned

The rule is not gonna come anytime soon either. It would cause false bans and be way too time consuming for the few staff members

And to the specific guy you are asking for. It's not like he is only on one account. Of course Omniscient is keeping an eye out for him, hence why he created a thread regarding this in the first place

Omniscient would not add a rule he can not follow himself. This rule would indeed require him to ban scammers, he would have to read through all scam reports and it would be up to him to decide whether or not it's legit. That will lead to false bans.

The ideas of banning scammers is great, but on a forum with over 3 million members and 4 staff members, it would just not be possible.

Because if you're selling your account to someone or even giving it away then you're likely allowing it to be used to scam members. I think that makes you implicit in the scam. At the very least it's unscrupulous.

Say someone offers you \$50 for your Ub3r account. You sell it. You gotta know that the account will then be used to scam others in the community. That's just wrong. In my view, you're just as much responsible for the scam as the scammer.

Someone trying to SE you into giving them BTC. Simple fact....TRUST NO ONE and then you'll be fine. Consider that everyone here is out to get you. Some for money and some for the lulz.

I suspect that to be a real statistic but over a period of 5-7 years. We have a serial scammer that has year after year targeted the community. You think we have a lot of scammers here but most scams are small-time under \$50 but one guy I'm aware of does it like a pro and has been earning thousands a year from it. He brags all the time.

It's not hard to understand that we have these types of people in the world. Consider criminals who have killed dozens of people with almost no reason. This serial scammer has deep mental issues

and won't be stopped by decency or guilt. He will need to be caught, arrested, and put into a cell forever. Or maybe never caught, who can know these things? But we should not be surprising that someone does this.

That's not the same guy. Greece guy has more obvious pattern. The guy I'm talking about works long-term. Most likely he has a major account now that he's building up to do a \$xx,xxx exit scam. Usually does that about once a year. I think he finds it more enjoyable than making \$50-\$100 a few times a week. Plus my guess is that he's a psychopath that enjoys building up trust then destroying it. He will lie to you at every turn.

In that case do you think Honor Et vertias (whatever) is still lying around, and possibly he could be conducting this, as you said before that you believe he has many accounts etc, and wouldn't be hard to do another exit scam.

Say someone offers you \$50 for your Ub3r account. You sell it. You gotta know that the account will then be used to scam others in the community. That's just wrong. In my view, you're just as much responsible for the scam as the scammer.

Solid point. I never thought of it that way. I completely agree

The only community alert that I see here is

"people scam on HF, some do it a lot more and take it a lot more seriously (mentally)"

Everything else in the op was all over the place; thread should be closed.
