J?son - January 1, 2017, 9:27 am

I estimate next year it will go back down to \$200

just from bitcoin history

Portugal - January 1, 2017, 9:29 am

That's awesome. I'm planning to sell some soon.

Now we have to hope that the price doesn't plummet anytime soon.

Diaxin - January 1, 2017, 9:29 am

It couldn't have happened in 2016, oh well fingers crossed it breaks \$1k and keeps climbing.

SwimmingPool - January 1, 2017, 9:30 am

I don't really care what it goes to. I bought most of my coins at \$500. I'm just going to keep hodling and spend them like I spend USD.

J?son - January 1, 2017, 9:30 am

Just sold all my coins also finally

GloryToBe - January 1, 2017, 9:31 am

I predicted it was going to break 1k tomorrow.

Just because people are selling it for \$1k doesn't mean that is yet it's value, watch preev and coindesk for when it officially breaks ?

Apocryphon - January 1, 2017, 9:41 am

When the BTC was "new", I had about 20-30 BTC.

Received them, played a bit with them and didn't know what it was really.

3 years later, I still regret the day I wasted my potential 30K at nothing. ?

Plague - January 9, 2021, 9:34 pm

Seeing stuff like this and checking my old blockchain accounts makes me realize back in 2015 even up to 2019 I never acquired bitcoin for investment purposes. I would use it to buy things specifically on communities like this one. Now it's pretty much hold onto any amount I receive no matter what.
