Thread: [Assault Cube Trainer With Admin Mode \(Source\)](#)

sp?c?m?n - January 2, 2017, 3:27 am

Made this quickly and just gonna share the source

Things for you to do

Add a loop

Enjoy and hope you learn something ?

Tip if you want someone download your stuff:

Spoiler [\(Click to View\)](#)

Malum™ - January 2, 2017, 6:16 pm

No screenshots. No virus scan. No source code. Brief description. No download.

EDIT: I was a hypocrite and barely read your thread, sorry! Checking out the source now.

After looking, here is something you could have done to shorten the code and have it a little more readable.

Offsets stored in class

Code private static class Offsets

```
{
    public static int ARC = 0x150;
    public static int ARA = 0x128;
    public static int admin = 0x220;
    public static int norecoil = 0x463786;
    public static int carbineAmmoOFF = 0x118;
    public static int carbineClipOFF = 0x140;
    public static int sniperAmmoOFF = 0x124;
    public static int sniperClipOFF = 0x14C;
    public static int shotgunAmmoOFF = 0x11C;
    public static int shotgunClipOFF = 0x144;
    public static int machinegunAmmoOFF = 0x120;
    public static int machinegunClipOFF = 0x148;
    public static int grenadeAmmoOFF = 0x158;
    public static int pistolAmmoOFF = 0x144;
    public static int pistolClipOFF = 0x13C;
    public static int unliHealthOFF = 0xf8;
    public static int unliArmorOFF = 0xFC;
```

}

Then setting writing to memory would look like this

```
Code vam.WriteInt32((IntPtr)(player + Offsets.ARA), 1337);  
      vam.WriteInt32((IntPtr)player + Offsets.ARC, 1337);
```

Or people can just re-consider that this is one of the most basic games in existence to hack with offsets that are all over the internet essentially.

Nobody? But that thread is from 6 months ago?

sp?c?m?n - January 3, 2017, 11:49 am

Just sharing what i made a external bhop tool source for csgo should be coming out very soon too !! hoping people can learn how to do this kind of stuff
