Thank you guys for vouching for our bet group.

Also to mention, our group currently haves 15+ members and you may ask who are the people posting reviews right now. They have joined from our other sale thread that my friend was running, but now I'm running this thread and handling all the sales. Previous customers will be leaving reviews here.

I've been in this group for a while now, and I've had quite a success in this group.

I went from \$30, untill a whooping \$100 in matter of days. After my calculations, I've tripled my investment in the matter of days!

Well where should I start?

OP is very helpful and the community within the group is always willing to help each other out!
Currently we are on a 6 win streak with the goal to reach 12 wins in a row so we earn 1000 from 10!

Before this group I was a total noob in betting, then the first day I doubled my money and right now I am much more experienced.

Of course there are always some losses, but that's the risk you take when betting. Not every game is predictable.

I rate it 9/10! Definitely worth it!

I was hooked. I bought the trial access which unfortunately became a mistake because the time is so damn short!(1 week?) But it's all good because with my winnings the price of joining this group, pays for itself. So far out of all my bets I've won 4 out of 5! I'm still up so I'm chillin!

We provide some bets that have really high chance of winning and we also provide info if its a safe prediction or risk prediction.

If we predict a safe bet, then you can but more to it.

But if its risky, we recommend to bet less than you normally would.

Of course there is 0 games that 100% will win, but yes we cover some of the games that should be easy win!

Fortunate - January 14, 2017, 2:44 am

Purchased a couple days ago.

There was some predictions today, some of them were safe tips and some risky tips.

I think it was the worst days they've had so far, it was a lot of losses instead of wins, but there are many reasons for that since the fields were really snowy.

Of course some bets hit, but the craziest thing is that I only bet on one game and I won 34\$.

Already on profit after purchasing access to the group. It was a bad day today, but I still made some profit.

Hopefully the next games are better like promised.

Love his sport predictions. his tips have made me a lot profit.

Been in this group for almost like 7 days and I have the professional package!

The group is nice, its still small but who cares since you're there for the tips (not the group)
Tips that oliver posts are usually everytime a win. Odds are also great, around 1.5x almost guaranteed for each game but of course there is higher games sometimes too but i like to play safe.

By playing safe and investing 24\$ for the access to group im on profit almost 100\$. I started with low amount on cloudbet but its still nice.

Playing safe & not rushing made good profit in 5 days.

Just wanted to give my opinion for future buyers, its worth it! I recommend month package!

You can bet with Bitcoin or Bank.

Im not sure if betting sites accept PayPal, but some might with a verification.

But you can deposit funds with bank if you're older than 18 (depends on your country laws but you should be able to) and BTC is any age obviously on cloudbet or nitrogensports.

More than welcome to join our group and I will help you personally!

PayPal doesn't allow funds to be used for gambling.

BTC/Bank/Debit card are the best.

If you're under 18 then the only way is for btc sites where I assume you dont have to provide ID.

VOUCH, if you are like me and you know nothing about sports nor gambling you really need to get this. He helps you in the best way he can, he also explains it as simple as possible and he is almost always online. Basically he is there if you need help or advise.I got to say if you are searching for a way to make money, this is it. Don't search further because you won't find anything better than this. I bought this 2 days ago and already made profit...

I started out with 0.02568 and now I got 0.0278 BTC in matter of days with no effort at all. I won 3 games out of 5 with some decent earnings with some risky bets and some safe ones. The two losses where both really unlucky, the first loss happend when they made a goal in the last minutes of the whole game and the second loss happend when I bet under 2.5 and sadly enough and it ended up with 2 - 1 but we still won the game (I still made profit 0.0001 BTC :P). The price is incredibly cheap compared to other ones and the win rate is super high.

Still have trust :) Well yeah. It has been the worst couple days in a month or two to be honest. Yesterday was just pure unlucky that none of the game hit but need to keep in mind that 2 of the games that I tipped I told are going to be risky and the one pretty safe tip I told its still pretty risky. (All of these games were 2+ odds)

But I expected atleast 2 of them to hit. Shit happens. I have recently been tipping these little riskier games since I got feedback from customers telling me that low odds (1,5+ or lower) are not that worth it so I decided to listen to them and post little riskier ones :)

Will go back to predicting more safer games. It is sometimes hard for me since I have to post at least 3 predictions a day as I have promised so some times I have to throw in some games that are little bit riskier.

This day will go better :) Lets hope.
